Motor Daewoo Damas Manual:

On a Global Mission: The Automobiles of General Motors International Volume 3 Louis F. Fourie, 2016-12-29
Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Sustainable Development of Transport Sonya M. Sultanova, Nilufar U. Babakhanova, Said S. Shaumarov, Ma'sud N. Masharipov, 2025-08-13
This book explores international experiences in the sustainable development of transport and logistics systems operating within specific regions. What sets this book apart is its proposal of a systemic approach to managing the sustainable growth of transport and logistics systems and the transport organizations within them. The novelty of this approach lies in its inclusion of scientific methodological and practical recommendations for organizing transport logistics in alignment with the ESG agenda. This book is intended for scholars investigating sustainable transport development from the perspectives of regional green and digital economies as well as labor and education economics. Members of this audience will find explanations of current trends in sustainable transport development and cutting edge scientific advancements supporting this growth amidst global ecological and digital transformations.
