Dynamics of Vehicle-Road Coupled System Shaopu Yang, Liqun Chen, Shaohua Li, 2015-04-29 Vehicle dynamics and road dynamics are usually considered to be two largely independent subjects. In vehicle dynamics, road surface roughness is generally regarded as random excitation of the vehicle, while in road dynamics, the vehicle is generally regarded as a moving load acting on the pavement. This book suggests a new research concept to integrate the vehicle and the road system with the help of a tire model and establishes a cross-subject research framework, dubbed vehicle-pavement coupled system dynamics. In this context, the dynamics of the vehicle, road, and the vehicle-road coupled system are investigated by means of theoretical analysis, numerical simulations, and field tests. This book will be a valuable resource for university professors, graduate students, and engineers majoring in automotive design, mechanical engineering, highway engineering, and other related areas. Shaopu Yang is a professor and deputy president of Shijiazhuang Tiedao University, China. Liqun Chen is a professor at Shanghai University, Shanghai, China. Shaohua Li is a professor at Shijiazhuang Tiedao University, China.

Noise and Vibration in Friction Systems Vladimir P. Sergienko, Sergey N. Bukharov, 2014-09-30 The book analyzes the basic problems of oscillation processes and theoretical aspects of noise and vibration in friction systems. It presents generalized information available in literature, data, and results of the authors in vibroacoustics of friction joints, including car brakes and transmissions. The authors consider the main approaches to abatement of noise and vibration in non-stationary friction processes. Special attention is paid to materials science aspects, in particular to advanced composite materials used to improve the vibroacoustic characteristics of tribopairs. The book is intended for researchers and technicians, students, and post-graduates specializing in mechanical engineering, maintenance of machines, and transport means production.
