Football in Neo-Liberal Times Peter Kennedy, David Kennedy, 2016-02-05 This book offers an original Marxist critique of the European football business It argues that the Marxist account of the difference between profits and surplus value is crucial to an understanding of the fluid and contradictory nature of the commodification of football Section one analyses the nature of modern professional football and section two highlights attempts via government agency and football clubs to corral fans into ever greater identification with business logic aimed at breaking traditional social relations Section three draws on a number of cases studies across Europe to analyse how some fans are attempting to mount a counter ideological response to the assault of neo liberalism on the game [Understanding Contexts Of Business In Western Asia: Land Of Bazaars And High-tech Booms](#) Leo-paul Dana, Aidin Salamzadeh, Veland Ramadani, Ramo Palalic, 2022-05-05 Not one size fits all Yet some books teach business with minimal focus on the context for business In reality firms large and small are highly affected by the context in which they operate yet context is not uniformly conceptualized theorized and operationalized by scholars of business and management While most theories have come from developed countries with bountiful contexts the diverse contexts of Western Asia are little understood Religious factors are profoundly dominant in Western Asia and businesses in this diverse area operate with considerations that are rarely considered in research This book reveals a variety of schools of thought that have molded several business models and mechanisms which are to some extent different from the context of Western economies [The Space Value of Money](#) Armen V. Papazian, 2022-09-03 The Space Value of Money introduces a fresh and innovative perspective on sustainability and finance It expands our financial value framework heretofore built around risk and time by factoring in space as an analytical dimension and our physical context The proposed principle and metrics entrench our responsibility for space impact into our value equations making finance inherently sustainable and acting as a theoretical bridge between core finance theory and the growing field of sustainable finance or ESG integration The book offers a novel approach to value design measurement and creation discussing the theoretical mathematical institutional technological and data elements of the transformation The Space Value of Money principle and metrics offer us the opportunity to adjust our financial value framework and transform human productivity in line with our sustainability targets They also enable the design and engineering of the financial instruments that can help us address our evolutionary challenges investment like the transition to Net Zero Every once in a while a book comes along that makes a fundamental contribution that is both profound and practical A book that every member of the National Space Council including the NASA Administrator and the Space Force chief of space operations should read The Space Value of Money will be of interest to ESG and impact investors government regulators financial theorists and outer space enthusiasts Lt Col Peter Garretson Senior Fellow in Defense Studies at the American Foreign Policy Council No doubt the pressing environmental challenges we face make the concept of the space impact of investments even more compelling Dr Pascal Blanqu Chairman

of Amundi Institute Former Group CIO of Amundi Asset Management The Space Value of Money brings much needed conceptual rigour whilst further advocating the case for a new paradigm shift in financial valuation This work gives us the lasting frameworks that aggregate impact across all spatial dimensions Dr Papazian culminates over ten years of research in this rich book providing the springboard for further innovation and system implementation in this area Domenico Del Re Director Sustainability and Climate Change PwC Enthralling and captivating Papazian offers a clear thorough and comprehensive discussion The Space Value of Money gives us an opportunity to reframe our thinking and to explore what is possible A great read Daud Vicary Founding Trustee of the Responsible Finance and Investment Foundation Armen has developed a novel way to create financial models that are better suited to dealing with the many parameters required if we are to properly consider environmental factors and sustainability in economics and finance I have found this engaging and look forward to seeing its future use Dr Keith Carne First Bursar King s College Cambridge University
