*Data* Badi H. Baltagi, 2009-06-22 This book is a companion to Baltagi's 2008 leading graduate econometrics textbook on panel data entitled *Econometric Analysis of Panel Data* 4th Edition. The book guides the student of panel data econometrics by solving exercises in a logical and pedagogical manner, helping the reader understand, learn, and apply panel data methods. It is also a helpful tool for those who like to learn by solving exercises and running software to replicate empirical studies. It works as a complementary study guide to Baltagi 2008 and also as a stand-alone book that builds up the reader's confidence in working out difficult exercises in panel data econometrics and applying these methods to empirical work. The exercises start by providing some background information on partitioned regressions and the Frisch-Waugh-Lovell theorem. Then it goes through the basic material on fixed and random effects models in a one-way and two-way error components models, basic estimation, test of hypotheses, and prediction. This includes maximum likelihood estimation, testing for poolability of the data, testing for the significance of individual and time effects, as well as Hausman's test for correlated effects. It also provides extensions of panel data techniques to serial correlation, spatial correlation, heteroskedasticity, seemingly unrelated regressions, simultaneous equations, dynamic panel models, incomplete panels, measurement error, count panels, rotating panels, limited dependent variables, and non-stationary panels. *Econometric Analysis of Panel Data* Badi

Baltagi, 2008-06-30 Written by one of the world's leading researchers and writers in the field, *Econometric Analysis of Panel Data* has become established as the leading textbook for postgraduate courses in panel data. These programs will be made available via an accompanying website which will also contain solutions to end-of-chapter exercises that will appear in the book. The text has been fully updated with new material on dynamic panel data models and recent results on non-linear panel models, and in particular work on limited dependent variables panel data models. **The Oxford Handbook of Panel Data** Badi Hani
