Morality Ethics And Gifted Minds:

Morality, Ethics, and Gifted Minds Don Ambrose, Tracy Cross, 2009-04-21 *Morality Ethics and Gifted Minds* explores much of the current wisdom on ethics and morality while developing new perspectives on the ethical dimensions of high ability. Prominent authors from diverse disciplines are brought together recognizing that no single discipline can capture the essence and entirety of nettlesome complex multidimensional moral issues. More specifically, the book explores new dimensions of ethics and morality, magnifies the importance of applying highly intelligent minds to ethical issues while developing ways to strengthen the ethical awareness of the creative and gifted, and brings diverse interdisciplinary perspectives to bear on these issues. *Handbook for Counselors Serving Students With Gifts and Talents* Tracy L. Cross, Jennifer Riedl Cross, 2021-09-30 The second edition of *Handbook for Counselors Serving Students With Gifts and Talents* provides the definitive overview of research on the general knowledge that has been amassed regarding the psychology of gifted students. This book introduces the reader to the varied conceptions of giftedness, covers issues specific to gifted children and various intervention methods, describes programs designed to fulfill the need these children have for challenge, is updated and expanded addressing contemporary issues, reflects the latest research on giftedness, with chapters authored by leading experts in the field. *Handbook for Counselors Serving Students With Gifts and Talents* is a resource professionals can turn to for answers to a wide variety of questions about gifted children. [The Palgrave Handbook of Transformational Giftedness for Education](#) Robert J Sternberg, Don Ambrose, Sareh Karami, 2022-04-23 This handbook examines what education would look like if it prepared gifted students to transform the world to make it a better place for all, not just for those who receive extra resources from schools in return for being labeled as gifted. The editors explore how transformationally gifted people can seek to make the world a better and more just place; they try to make a positive, meaningful, and possibly enduring contribution to changing things in the world that are not working. They do not view giftedness merely as a transaction whereby, in exchange for being labeled as gifted, they accrue benefits to themselves such as a more prestigious education, more income, or residence in a more exclusive community. The overarching aim of this book is to present conceptions of what identification and instruction of the gifted would look like if the focus of gifted education was transformational rather than transactional. What if gifted education did not focus so much on acceleration vs enrichment or pull out versus in-class integration but rather on how to be gifted in giving back, in using one's gifts to create a better world. [Critical Thinking in Moral Development](#), 2024-12-09 This book is for anyone interested in these topics, whether they are veterans or relative newcomers to the field, because the editors have assembled a stellar group of seventeen international contributors. There are four sections devoted respectively to philosophical perspectives, developmental psychology, educational practices, and assessment. Each section consists of three initial chapters followed by a commentary that highlights notable themes and gives guidance for further inquiry. Along with the Introduction and Epilogue contributed by the

editors Daniel Fasko and Frank Fair the chapters develop themes such as the role of the ideas of Aristotle and Kant in shaping our moral development and educational practices Here readers will encounter informative discussions of among other things The 4Es of Virtuous Purpose The Rational Construction of Morality and Philosophy Goes to High School Readers are also led to consider Measures of Moral Identity The EQUIP Program and Assessing Value Clarity and Moral Blueprints The diversity of expertise and the international vantage points of the contributors make this book an informative overview for the expert and a useful introduction for the beginning student concerning the issues involved Contributors are Jennifer Baker Marvin W Berkowitz M Neil Browne Michael W Creane Juan P Dabdoub Frank Fair Daniel Fasko Jr John C Gibbs David Kaspar J n Knap k Martina Kosturkov Shane McLoughlin Chad Miller Benjamin Mitchell Yellin David Moshman G Felicitas Munzel Renee B Patrick Timothy S Reilly and Di You
