Computational Science and Technology Rayner Alfred, Hiroyuki Iida, Havaluddin Havaluddin, Patricia Anthony, 2021-03-15 This book gathers the proceedings of the Seventh International Conference on Computational Science and Technology 2020 ICCST 2020 held in Pattaya Thailand on 29-30 August 2020. The respective contributions offer practitioners and researchers a range of new computational techniques and solutions, identify emerging issues and outline future research directions while also showing them how to apply the latest large-scale high-performance computational methods. **Advances in Guidance, Navigation and Control** Liang Yan, Haibin Duan, Yimin Deng, 2025-03-07 This book features the latest theoretical results and techniques in the field of guidance, navigation and control (GNC) of vehicles and aircrafts. It covers a wide range of topics including but not limited to intelligent computing, communication and control, new methods of navigation, estimation and tracking, control of multiple moving objects, manned and autonomous unmanned systems, guidance, navigation and control of miniature aircraft and sensor systems for guidance, navigation and control, etc. Presenting recent advances in the form of illustrations, tables and text, it also provides detailed information of a number of the studies to offer readers insights for their own research. In addition, the book addresses fundamental concepts and studies in the development of GNC, making it a valuable resource for both beginners and researchers wanting to further their understanding of guidance, navigation and control. **Agrindex**, 1991 **Physics Briefs**, 1994 **Electrical & Electronics Abstracts**, 1997 **Mental Maths Strategies** Alan Parker, 2004 Mental Maths is the maths we do in our heads without the use of calculators and without writing down the calculation. Mental Maths strategies are the tricks we use to do Maths in our heads. There are different ways of finding the answer to any Mental Maths problem and such strategies are the focus of this series. Even though calculators and computers play an enormous role in the modern world, we still need to go back to the basics. We do need to know how to check that the sales assistant at the counter is giving us the right change. Mental Maths has become more important than ever, and new primary Maths syllabuses in Australia are reflecting this. For example, NSW has placed an emphasis on Mental Maths in its primary syllabus, and even the Year 10 School Certificate examination has a compulsory non-calculator section. Features of this book include 32 double-page units of Mentals, 8 units for each school term. Each unit is divided into four sets A, B, C and D of 20 questions each. Each numbered question covers particular Maths topics throughout the book. For example, Question 1 always covers addition while Question 20 always covers geometry. A special eHelp section at the front of the book gives different strategies and explanations to help students solve Mentals problems. These are also numbered so they link to the question numbers in each Mentals unit. A eFun Spot unit containing fun activities and a eRevision unit are included at the end of each 8 units extra practice sections which reinforce particular strategies. Answers to all questions are in a lift-out section in the centre of the book.
