This book explores the intricate world of strategic management. Blending theory with practical examples, the authors provide a systematic framework for strategic decisionmaking. The book is divided into two parts. It begins by exploring the perspectives of strategic analysis, examining the firm's current situation and evolutionary perspectives, as well as the objective reality and subjective perspective. These interconnected perspectives require different analytical approaches to understand the firm's present state and the process of change. The second part, entitled "The strategic map," delves deeper into specific areas of strategic analysis. It focuses on the current state of the firm today, emphasizing the importance of understanding its resources, products, markets, activities, and stakeholder relationships. The quality and implementation effectiveness of the strategic model are also assessed, providing a reflection tool for improvement. The book further explores strategic change processes, the values and identity of the firm, performance evaluation, and corporate governance and internal control systems. Suitable for newcomers and professionals in corporate strategy and governance, this book combines theory and practical examples to enhance understanding.

A Dynamic Perspective Ellie Gough, 2014-11-07

Strategic management involves formulation and implementation of the major goals and initiatives taken by a company's top management on behalf of owners, based on consideration of resources and an assessment of the internal and external environments in which the organization competes. Strategic management provides overall direction to the enterprise and involves specifying the organization's objectives, developing policies and plans designed to achieve these objectives, and then allocating resources to implement the plans. Academics and practicing managers have developed numerous models and frameworks to assist in strategic decision making in the context of complex environments and competitive dynamics. Strategic management is not static in nature; the models often include a feedback loop to monitor execution and inform the next round of planning.
