**Student Attendance Monitor Using Rfid** Wajid Ishfaq,Modassir Ishfaq,2012-04 This project is based on the development of attendance monitoring system called mobile student attendance monitor This project is motivated for the reason that the student s attendance record is the most important element which can reflect their academic achievement in the institutions Mostly the attendance register is circulated in the lecture rooms by the lecturers This procedure is time taking method and unsuitable for huge number of students in a big lecture hall Aim of the project is to develop an efficient user friendly and effective mobile attendance system that provides an alternative solution to manual attendance in the educational institutions This prototype system has been built using different technologies like as PHP My SQL and VB NET to deal the students attendances by using RFID reader As most of the academic institutions provide their students and staffs ID cards with RFID tags on them These cards are also known as smart cards This project is designed to collect and manage student attendance through this technology which works on the verification of the students ID and recording their time of entrance and exit in the lecture halls Design of a User Driven Real Time Asset Tracking System Using RFID in a Healthcare Environment Kaustubh Rajan Erande,2008 **Smart Device Tracking System Using RFID (DeviceTrex)** Norazila Alias,2010

Automated Student Attendance System Using "RFID". Barzan Awat Ali,2016 Since the invention of computers developers are working progressively to create automated machines in the area of artificial intelligence In conjunction with the evolution of artificial intelligence techniques the artificial area has developed robustly and at the present time scientists are creating machines that are able to check student s attendance that is the machine that has an artificial sense Intelligent machines that can help humans perform daily activities easier are widely developed today and they attract user s attention to a high degree One of the important daily activities to many users especially education departments and institutions is checking student s attendance The idea of this project is to develop an automated attendance system to help schools and universities with their attendance checking systems Creating a project like this will aid education departments world widely especially in developing countries for instance here in Kurdistan Region checking student attendance is an important issue for universities concerning the policies regarding attending classes and in almost every university in Kurdistan pen and paper is been used to

control student s attendances This old techniques of controlling student attendance takes too much time and problems occurs while taking it Having systems like RFID Radio Frequency Identification will give us ideas to create a system for taking attendance of students which makes the process easier
