**Legal environment assessment for the prevention of non-communicable diseases** World Health Organization, United Nations Development Programme, 2023-12-18 This guidebook developed collaboratively by the United Nations Development Programme UNDP and the World Health Organization WHO provides an operational framework for conducting legal environment assessments to prevent non-communicable diseases (NCDs). Aimed at policymakers and health professionals, it outlines strategies for planning, conducting desk reviews, engaging key informants, and formulating and validating reports. The guide emphasizes the role of law and policy in addressing risk factors like tobacco use, alcohol consumption, unhealthy diets, and physical inactivity. It supports the implementation of WHO recommended interventions and aligns with global health targets, including those of the Sustainable Development Goals. The publication aims to empower low and middle-income countries to combat the NCD epidemic, reduce premature deaths, and promote health equity. *Enabling legal frameworks for sustainable land-use investments in Tanzania: Legal assessment report* Robert Kibugi, D. Andrew Wardell, Marie-Claire Cordonier Segger, Caroline Haywood, Renée Gift, 2015-10-08 The International Development Law Organization IDLO and the Center for International Forestry Research CIFOR assessed the legal frameworks that govern land use activities and investments in Tanzania. The policy, institutional, and legal frameworks are well developed, although implementation and enforcement remains weak due to ambiguities in the law and a general lack of supportive incentives. This Legal Assessment report for Tanzania examines four key challenges to the attainment of sustainable land use investments. These comprise: Enforcement of environmental and social safeguards. Tanzania has made progress in implementing the Environmental Management Act by ensuring greater compliance with the Environmental Impact Assessment regulations, although exceptions exist in the construction sector and mining legislation that often enables the government to circumvent important land tenure safeguards. Incentives for sustainable investments in the legal framework. A lack of incentives exists despite the creation of the Tanzania Investment Centre, the adoption of an Investment Guide in 2013, and the incorporation of sustainability considerations into laws and policies governing investments in the agriculture, energy, and forestry and mining sectors. Land tenure security. Tanzania's land law framework now includes formal recognition of customary title and the reservation of land under the category of village land exclusively for Tanzanians, although improvements are still needed in terms of processes of consultation and compensation. Public awareness and lack of access to information. Awareness of natural resources and investment policies, legislation, and regulations is generally low amongst rural communities, as well as Ward executive officers, village leaders, and village land committee members. Rural radio represents their most important source of information. [Nurses Making Policy](#) Rebecca M. Patton, Margarete L. [Strategic Decision-Making in Dynamic Business Environments](#) Rim El Khoury,2026-01-01 This book offers business leaders and managers a comprehensive framework for strategic decision making in today s dynamic markets By integrating systems theory and control

methodologies it equips professionals with tools to navigate complexities and uncertainties inherent in modern business environments. The main topics include understanding dynamic business landscapes, applying systems thinking to organizational processes, implementing control mechanisms in strategic management, modeling business dynamics, making decisions under uncertainty, developing adaptive strategies for market volatility, integrating technology into strategic decisions, fostering organizational learning and systemic change, and anticipating future trends in strategic decision making. These topics are crucial as they address the challenges posed by rapid technological advancements and globalization which have introduced unprecedented levels of complexity and uncertainty in business operations. Traditional decision making models often fall short in such contexts necessitating a more holistic and adaptable approach. The primary problem this book seeks to solve is the difficulty business leaders face in making effective strategic decisions amidst constant change and uncertainty. By providing a structured approach that combines systems theory and control mechanisms, it enables leaders to understand the interdependencies within their organizations and the external environment, facilitating more informed and resilient strategic choices. This resource is tailored for business leaders, managers, strategic planners, and scholars interested in enhancing their decision making capabilities through the application of systems and control theories in business contexts. By bridging theoretical concepts with practical applications, it serves as a valuable guide for those seeking to improve organizational performance in today's dynamic business landscape.

**Stakeholders, Sustainable Development Policies and the Coal Mining Industry** Izabela Jonek-Kowalska, Radosław Wolniak, Oksana A. Marinina, Tatyana V. Ponomarenko, 2022-03-29

This book identifies the impact of internal and external stakeholders on the implementation of sustainable development policies in the coal mining sector in Europe and the Commonwealth of Independent States. The book assesses what activities and conditions need to be improved so that sustainable development policies can be more effectively and efficiently implemented. With a specific focus on the hard coal and lignite mining sectors, it examines a broad range of case studies from Eastern European countries and the Commonwealth of Independent States including Russia, Ukraine, Poland, Kazakhstan, Germany, Spain, France, and the United Kingdom among many more. Beginning with an introduction to sustainable development and stakeholder theory, Part II then examines internal stakeholders including owners, managers, employees, and trade unions. Part III examines external stakeholders touching upon those directly related to the mining industry such as customers and mining enterprises, and those not directly associated such as local and regional communities and environmental organisations. The book concludes by proposing a model approach to the management of stakeholders involved in mining enterprises, focusing on improving the process of implementing sustainable development in the mining sector and strengthening the effects of this process. This book will be of great interest to students and scholars of the extractive industries, natural resource management, and policy and sustainable development.
