Competition, Data and Privacy in the Digital Economy Maria Wasastjerna, 2020-07-16 Increasingly we conduct our lives online and in doing so we grant access to our personal information The crucial feedstock of the world economy thus generated the commercialization and exploitation of personal data and the intrusion of digital privacy it entails has built an imposing edifice of market power As we enter the third decade of the 21st century this detailed exploration of the interlinkage between competition and data privacy takes a critical look at competition policy to evaluate whether the system in its current form and with the existing approach is capable of tackling the challenges raised by the role of personal data in the shift from an offline to an online economy Challenging the commonplace assumption that privacy has little or no role and relevance in competition law the author s penetrating analysis accomplishes the following and more provides an in depth

understanding of the intersection of competition and privacy in the data driven economy surveys legal policy developments on the role of privacy in competition law underlines the importance of non price parameters in competition such as consumer choice clearly explains why and how competition law can protect privacy among its policy objectives and addresses challenges in measuring the intangible harm of digital privacy violation in assessing abuse of market power Recent case law in Europe and elsewhere a revealing comparison between relevant European Union EU and United States US practice the expanded role of the EU s Competition Commissioner and the likely impact of such phenomena as the coronavirus pandemic are all drawn into the book s remit In her analysis of the growing privacy dimension in competition policy the author examines the topic from a broad perspective that includes societal political economic historical and cultural elements Her insightful multidimensional and value based review will prove of immeasurable value to practitioners academics policymakers and enforcers in its identification of implications for business practice as we go forward

Handbook on ICT in Developing Countries Knud Erik Skouby, Idongesit Williams, Albert Gyamfi, 2022-09-01 Handbook on ICT in Developing Countries Next Generation ICT Technologies is the second volume of the Handbook of ICT in Developing Countries The first volume was on the potential implementation and service delivery of the forth coming 5G networks Here the focus is on the new technologies and services enabled by 5G networks or broadband Internet networks including artificial Intelligence AI machine learning augmented reality Internet of Things IoT autonomous driving blockchain solutions cloud solutions etc Some of these are already globally experiencing growth in the existing networks and all of them are expected to grow substantially in the future Examples currently 5% of global organizations have fully adopted AI but the penetration is expected to increase rapidly before 2025 IoT with 20 35 billion devices connected in 2017 is estimated to show 75 44 billion devices connected in 2025 The expected growth is based on delivering of new value to businesses and citizens It is however not obvious that this growth will also occur in developing countries Currently the digital divide between developing countries and developed countries is widening This is mostly due to the lack of infrastructure and low level of awareness by the businesses and citizens of the value made possible by the new technologies for developing countries The book discusses the potentials of the new technologies for developing countries and the need for market interventions that will facilitate the demand and supply side of the market It is designed for a broad audience including practitioners researchers academics policy makers and industry players and influencers The language and approach to the handbook is a combination of the academic writing style and professional reviews
