Adaptive Filtering Paulo S. R. Diniz, 2019-11-28 In the fifth edition of this textbook author Paulo S R Diniz presents updated text on the basic concepts of adaptive signal processing and adaptive filtering He first introduces the main classes of adaptive filtering algorithms in a unified framework using clear notations that facilitate actual implementation Algorithms are described in tables which are detailed enough to allow the reader to verify the covered concepts Examples address up to date problems drawn from actual applications Several chapters are expanded and a new chapter Kalman Filtering is included The book provides a concise background on adaptive filtering including the family of LMS affine projection RLS set membership algorithms and Kalman filters as well as nonlinear sub band blind IIR adaptive filtering and more Problems are included at the end of chapters A MATLAB package is provided so the reader can solve new problems and test algorithms The book also offers easy access to working algorithms for practicing engineers

On Distributed and Cooperative Control Design for Networks of Dynamical Systems Georg Seyboth, 2016-06-17 This thesis contributes to the development of a cooperative control theory for homogeneous and heterogeneous multi agent systems consisting of identical and non identical dynamical agents respectively The goal is to explain fundamental effects of non identical agent dynamics on the behavior of a distributed system and primarily to develop suitable control design methods for a wide range of multi agent coordination problems Output synchronization problems as well as cooperative disturbance rejection and reference tracking problems in multi agent systems are investigated Suitable controller design

methods for networks consisting of identical or non identical linear time invariant systems linear parameter varying systems and selected classes of nonlinear systems are developed These controller design methods provide a solution to a wide variety of distributed coordination and cooperative control scenarios
