Trestrail, III, 2007-10-28 In this revised and expanded edition of his critically acclaimed *Criminal Poisoning Investigational Guide for Law Enforcement Toxicologists, Forensic Scientists, and Attorneys*, leading forensic scientist John Trestrail offers a pioneering survey of all that is known about the use of poison as a weapon in murder. Topics range from the use of poisons in history and literature to convicting the poisoner in court and include a review of the different types of poisons, techniques for crime scene investigation, and the critical essentials of the forensic autopsy. The author updates what is currently known about poisoners in general, psychological profile types, and statistical analyses, and their victims who get poisoned, investigative considerations, and classic symptoms of poisoning. The Appendix has been updated to include the more commonly used poisons, as well as the use of antifreeze as a poison, to reflect some cases that have recently come to light

Volume 2: *The Global Arena* offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed.
