

**UNIT IGC3 – THE HEALTH AND
SAFETY PRACTICAL APPLICATION**

nebosh

Student number:

Location: Head Race Tunnel of under construction XYZ* Hydro Electric Power Plant

Date of review: 25 / February / 2012

* - Name of the power plant is confidential and may infringe with my employment contract conditions and hence has not been revealed herewith in this report.

Introduction:

This Health & Safety inspection was carried out by me on 25th February 2012 between 1230 hrs and 1330 hrs at the Head Race Tunnel (HRT) area of the under-construction XYZ* Hydroelectric power plant. The project is a run-of-river type 100 MW hydro electric power plant designed with a 4 Meter diameter and 1.2 KM long Head race Tunnel. During the time of this inspection, construction of the HRT was in progress, with approximately 300 meters out of the 1.2 KM length being completed. The selected contractor had deployed 30 workers inside the head race tunnel for this job.

Following activities were in progress inside the HRT during the time of inspection: Concreting on the inner tunnel surfaces using the Hydraulic Gantry, removal of muck, transportation of concrete, Use of winches to support the Gantry, Constant De-watering and part-assembly of the Gantry parts using hot work.

Executive Summary

A Health & Safety inspection was carried out on 25th February 2012 at the Head Race Tunnel (HRT) area of the under-construction XYZ* Hydroelectric power plant. The main objective of this inspection was to identify prevalent HSE hazards which may cause ill-health and or Human injury. At the time of inspection, following jobs were being undertaken: Concreting on the inner tunnel surfaces using the Hydraulic Gantry, removal of muck, transportation of concrete, Use of winches to support the Gantry, Constant De-watering and part-assembly of the Gantry parts using hot work.

This inspection clearly reveals that there are very serious hazards (mechanical handling, electrical systems, geological hazards, machinery related) which if left unattended, may result in multiple serious injuries or even multiple fatalities. The major area of concern is the Gantry works, where-in, the possibility of winch failure, injury by falling rocks, serious electrocution and high noise hazards exist. Mitigation and initiation and implementation of risk reduction measures is highly recommended in this case. The other aspect, which has less potential of human injuries, but, more potential of business loss (due to possible cancellation of work licence) is the failure to provide worker welfare facilities at Adit** 3. Keeping view of the management commitment towards HSE, it is recommended that immediate action is undertaken to safe guard the company's social, financial & moral interests.

** - Adit means : Approach passage to reach the main HRT Tunnel
