Handbook of Biopolymers and Biodegradable Plastics Sina Ebnesajjad, 2012-09-19 This new Handbook provides engineers and scientists with the information and practical guidance needed to successfully design and manufacture products using biopolymers and biodegradable plastics Biopolymers and biodegradable plastics are a hot issue across the plastics industry and for many of the industry sectors that use plastic from packaging to medical devices and from the construction industry to the automotive sector This book brings together in one place a number of key biopolymer and biodegradable plastics topics in chapters previously published as well as updated and new chapters for a broad audience of engineers of and scientists especially those designing with biopolymers and biodegradable plastics or evaluating the options for switching from traditional plastics to biopolymers Topics covered include preparation fabrication applications and recycling including biodegradability and compostability Applications in key areas such as films coatings controlled release and tissue engineering are discussed

Novel Therapeutics from Modern Biotechnology Dale L. Oxender, Leonard E. Post, 2013-06-29 A cover story of Business Week Magazine in January 1984 stated Biotech Comes of Age In February 1986 Venture Magazine had a cover article entitled The Biotech Revolution is Here This article went on to say New Genetic Technologies Will Transform Our Lives These announcements were made many years after the first biotechnology companies such as Genentech Cetus Amgen and Biogen were formed to commercialize the New Biology At the time of writing this book

there are over 1300 biotech companies developing new technologies or identifying potential biotech drugs Most of these companies were started in the height of the high technology hype although companies are still forming as the technology advances A more recent survey showed only a relatively small number of Food and Drug Administration FDA approvals among over several hundred biotech nology products now in clinical trial One could ask why it has taken so long to produce biotechnology products Part of the reason is that each new class of biotech products brings with it a set of problems that need to be solved before they enter clinical trials These problems are often unique to biotechnology products such as peptides proteins monoclonal antibodies nucleic acids and cellular therapies
