Does an Apple a Day Keep the Doctor Away? Sandy Donovan, 2017-08-01 An apple a day keeps the doctor away Humans use only ten percent of their brains If you cross your eyes they ll stay that way You may have heard these common sayings and beliefs before But are they really true Can they be proven using science Let s investigate seventeen health related statements and find out which ones are right which ones are wrong and which ones still stump scientists Find out if the five second rule for dropping food on the floor is true Discover if eating chocolate can give you pimples See if you can tell the difference between fact and fiction with *Is That a Fact*

*Human Physiology* Stuart Ira Fox, 2004 A study of human physiology The beginning chapters introduce basic chemical and biological concepts and the chapters that follow promote conceptual understanding rather than rote memorization of the facts Topics new to this edition include neural stem cells integrins and taste cells The Stem Cell Epistles Michael A. Buratovich, 2013-08-20 Human embryos it has been said have no muscles nerves digestive system feet hands face or brain they have nothing to distinguish them as a human being and if one of them died no one would mourn as they would for one of us Consequently early human embryos are being dismembered in laboratories around the world to produce embryonic stem cells which we are told are the tools that will lead

to the next quantum leap in medicine Should Christians support such small sacrifices for something that might potentially relieve the suffering of millions or should we vigorously oppose it Developmental biologist and professor of biochemistry Michael Buratovich was asked such a question among others by his students This book contains his measured answers and provides support from the scientific literature to substantiate his claims He shows that embryonic stem cells are unnecessary since the renaissance in regenerative medicine is occurring largely without them Furthermore he sets forth the scientific and historic case that the embryo is the youngest and most vulnerable member of humanity and that ones such as these are precisely those whom the Christian church worked to protect in the past and should champion in the present
