**Hope for the Youth** Osei Owusu - Aduomi,2014-01-17 A Stitch in time saves nine Effective moral and spiritual education and positive exposure are the stronger weapons against the negative personality symptoms discussed in this book I humbly implore the whole world to take up the challenge with passion and unflinching love to create an educational and parenting system whose content and practice can effectively reduce or eliminate these negative personality symptoms Hope For The Youth is therefore a deliberate effort to train the child the way he should go so that when he grows he should not depart from it **Global Challenges in Maritime Security** Lisa Otto,Anja Menzel,2024-10-22 Achieving sustainability is perhaps the

single most important task for our generation In the face of a looming climate disaster calls for the sustainable use of the world s resources are getting louder As the sea covers more than 70 per cent of the earth s surface this holds even more true for the use of ocean resources Despite its vastness the sea has often been a securitised and politicised space where the concepts of sustainability and security meet at sea in the form of a myriad of important contemporary issues In this volume

we set out the intersection between sustainability and security alongside the security development nexus and examine these issues under four dimensions of security economic security ecological security human security and traditional security Within sections dedicated to each of these we explore both theory and practice by offering cases alongside a conceptual discussion and in so doing cover topics ranging from the Blue Economy and the net zero agenda to natural disasters and climate change from food security and the future of Small Island Developing States to the geopolitics of the Arctic This book takes a bird s eye view connecting the dots between these issues of security and sustainability and ending with scenarios for the future with policy making in mind This volume presents a timely and compelling argument that policymakers and scholars need to come to terms with the intersection of sustainability and security at sea The editors detail a clear and insightful conceptual approach for grasping the simultaneity and interplay of security and sustainability concerns that will give inspiration to further research in the field Chapter contributors convincingly illustrate aspects of this approach across regions scales and sites of political engagement from port cities to the UN A must read for students researchers and practitioners of ocean politics Elana Wilson Rowe Research Professor at the Norwegian Institute of International Affairs NUPI Too often issues of security and sustainability at sea have been studied in narrow terms This volume makes a critical contribution the literature by unpacking the interconnections and interdependence between these two vitally important issues Robert McCabe Assistant Professor and Director of the MA Maritime Security Programme at Coventry University In this timely publication an international set of contributors portray a rich array of views on the oceans security and sustainability for the reader Of particular value is how the security sustainability nexus runs through the chapters to emphasise the ever growing importance and relevance of this interplay Francois Vre Professor Emeritus of Military Science and Research Coordinator at the Security Institute for Governance and Leadership in Africa SIGLA Stellenbosch University
