from South African Technology Stations to Their SME Clients** Leisl Joanne Neskakis, 2012-03-15 It is widely held that  
technology transfer is closely linked to a nation s economic development For this reason the South African government  
assigned twelve technology stations to support small and medium sized enterprises SME The main aim of these stations is  
the transfer of technology from the universities where they are housed to the SMEs in scientific areas ranging from  
biotechnology to agriculture This study delivers a detailed analysis of each technology station and offers an explanation as to  
why some technology stations are more successful than others This study focuses on the influence of the organizational  
culture on technology transfer and employs Cultural Theory to analyze categorize and thereby compare the culture types of  
the organizations being studied A few other interesting discoveries are also made by this study that Grid Group Cultural  
Theory can be utilized in the methodology of a study to determine the organizational culture of any organization that if the  
impact of organizational culture on technology transfer can be determined empirically then the impact of organizational  
culture on other factors can also be determined empirically and that if organizational culture can be used to determine the  
success of technology transfer then it can probably determine the success of other organizations irrespective of what service  
that organization provides **The Essentials of Knowledge Management** John S. Edwards, 2016-04-29 This book reviews
