Interpretive Research Design Concepts And Processes Routledge Series On Interpretive Methods:

Interpretive Research Design Peregrine Schwartz-Shea, Dvora Yanow, 2013-06-17 Research design is fundamental to all scientific endeavors at all levels and in all institutional settings. In many social science disciplines, however, scholars working in an interpretive qualitative tradition get little guidance on this aspect of research from the positivist-centered training they receive. This book is an authoritative examination of the concepts and processes underlying the design of an interpretive research project. Such an approach to design starts with the recognition that researchers are inevitably embedded in the intersubjective social processes of the worlds they study. In focusing on researchers' theoretical, ontological, epistemological, and methods choices in designing research projects, Schwartz-Shea and Yanow set the stage for other volumes in the Routledge Series on Interpretive Methods. They also engage some very practical issues such as ethics reviews and the structure of research proposals. This concise guide explores where research questions come from, criteria for evaluating research designs, how interpretive researchers engage with world-making context, systematicity and flexibility, reflexivity and positionality, and such contemporary issues as data archiving and the researcher's body in the field. **The SAGE**

Handbook of Process Organization Studies Ann Langley, Haridimos Tsoukas, 2016-12-14 The SAGE Handbook of Process Organization Studies provides a comprehensive and timely overview of the field. This volume offers a compendium of perspectives on process thinking, process organizational theory, process research methodology, and empirical applications. The emphasis is on a combination of pedagogical contributions and in-depth reviews of current thinking and research in each of the selected areas, combined with the development of agendas for future research. The Handbook is divided into five sections: Part One Process Philosophy, Part Two Process Theory, Part Three Process Methodology, Part Four Process Applications, Part Five Process Perspectives. Identities, Borderscapes, Orders Benjamin Tallis, 2023-02-06 This book provides a pre-history of Russia's war on Ukraine and Europe's relations to it, illuminating the deep roots of the EU's neighbourhood crisis as well as the migration crises the Union created in the last decade. To do so, the book employs a new and innovative framework that allows for a comprehensive yet nuanced analysis of borders and a more cogent interpretation of their socio-political consequences. Drawing on interdisciplinary scholarship, the book analytically examines the key common elements of borderscapes and links them in related arrays to allow for nuanced evaluation of both their particular and cumulative effects, as well as interpretation of their overall consequences, particularly for issues of identities and orders. The book offers a significant conceptual and theoretical advance, providing a transferable conceptualization of borderscapes to guide research analysis and interpretation. Drawing on the author's experience in policy practice and academia, it also makes a methodological contribution by pushing the boundaries of reflexivity in interpretive International Relations (IR) research. Analyzing three main sites in Central and Eastern Europe (CEE), the book challenges conventional critical wisdom on EU bordering in the Schengen zone at its external frontiers and in its Eastern neighborhood. In so doing, it sheds new light on the

politics of post communist transitions as well as the contemporary politics of CEE It also shows how EU bordering and its relations to identities and orders created great benefits for many Europeans but also hindered the lives of many others and became self defeating This book is a must read for scholars students and policy makers interested in a better understanding of Critical Border Studies CBS in particular and International Relations in general It will also appeal to anyone interested in CEE or wishing to get a deeper understanding of Russia s war and the fight for Europe s future

The Emergence of Novelty in Organizations Raghu Garud, Barbara Simpson, Ann Langley, Haridimos Tsoukas, 2015-03-05 Creativity innovation and change are vital to the development and sustainability of all organizations Yet questions remain about exactly how novelty comes about and what dynamic processes are involved in its emergence Ideas of emergence and process drawn from a variety of different philosophic traditions have been the focus of increasing attention in management and organization studies These issues are brought to bear on novelty and innovation in this volume by examining new organizational and product development processes whether planned or unplanned The contributions in this volume offer both theoretical insights and empirical studies on inter alia innovation music technology haute cuisine pharmaceuticals and theatre improvisation In doing so they throw light on the importance of emergence improvisation and learning in organizations and how both practitioners and scholars alike can best understand their own assumptions about process In addition the volume includes general essays on process perspectives in organization studies

European Dimension of Metropolitan Policies Carola Fricke, 2019-03-23 This book questions how policies for the metropolis become Europeanised The book analyses how spatial concepts and political ideas permeate the European multi level system Through an interpretive comparison of five contexts the book provides an overview of the European orientation tracing two interdependent developments First the book examines references to Europe in national and subnational policies In French and German policies metropolitan regions are increasingly framed as being central not only for inter municipal coordination but also as nodes within the European space Moreover Europeanised metropolitan regions such as Lyon and Stuttgart develop European strategies The second development shows how metropolitan regions appear as actors and issues in the European policy arena contributing to a tentative and implicit metropolitan dimension This multi scalar analysis is of interest for scholars and practitioners specialised in metropolitan regions European urban and regional policies geography and related areas
