Hutchinson, 2005-04-04 This book offers a radical challenge to accounts of the common law s development Contrary to received jurisprudential wisdom it maintains there is no grand theory which will explain satisfactorily the dynamic interactions of change and stability in the common law s history Offering original readings of Charles Darwin s and Hans Georg Gadamer s works the book shows that law is a rhetorical activity that can only be properly appreciated in its historical and political context tradition and transformation are locked in a mutually reinforcing but thoroughly contingent embrace In contrast to the dewy eyed offerings of much contemporary work it demonstrates that like life law is an organic process i e events are the products of functional and localized causes rather than a miraculous one i e events are the result of some grand plan or intervention In short common law is a perpetual work in progress evanescent dynamic messy productive
