Food Safety Umile Gianfranco Spizzirri, Giuseppe Cirillo, 2016-12-06 Food safety and quality are key objectives for food scientists and industries all over the world To achieve this goal several analytical techniques based on both destructive detection and nondestructive detection have been proposed to fit the government regulations The book aims to cover all the analytical aspects of the food quality and safety assessment For this purpose the volume describes the most relevant techniques employed for the determination of the major food components e g protein polysaccharides lipids vitamins etc with peculiar attention to the recent development in the field Furthermore the evaluation of the risk associated with food consumption is performed by exploring the recent advances in the detection of the key food contaminants e g biogenic amines pesticides toxins etc Chapters tackle such subject as GMO Analysis Methods in Food Current Analytical Techniques for the Analysis of Food Lipids Analytical Methods for the Analysis of Sweeteners in Food Analytical Methods for Pesticides Detection in Foodstuffs Food and Viral Contamination Application of Biosensors to Food Analysis

Green Chemistry in Food Analysis Leo M.L. Nollet, N.C. Basantia, 2025-11-19 In today's world ensuring the safety and quality of food is more critical than ever At the same time the need to reduce the environmental impact of laboratory practices is becoming a top priority across the scientific community Green Analytical Chemistry in Food Analysis bridges these two essential goals presenting a comprehensive and forward thinking guide to apply green chemistry principles in the analytical evaluation of food This book is a response to the growing demand for environmentally responsible techniques in food testing methods that do not sacrifice analytical accuracy sensitivity or precision It explores how green analytical chemistry GAC can transform every step of the food analysis process from sample collection and preparation to separation detection and data processing Through a combination of modern technologies novel methodologies and sustainable thinking the field is redefining how we approach contaminants residues and nutritional profiling in food Key topics include Green Sample Preparation Minimizing solvent usage and adopting eco friendly extraction methods Sustainable Separation and Detection Innovations in chromatography spectrometry titrimetry and gravimetry with reduced chemical and

energy footprints Cleaner Alternatives Natural indicators alternative solvents and energy efficient instruments
 Miniaturization and Direct Analysis Reducing waste through compact high efficiency systems Advanced Tools Chemometric
 and computational approaches to streamline processes and reduce laboratory interventions Real World Applications Case
 studies focusing on pesticide residues mycotoxins heavy metals and other critical food contaminants Scoring Greenness
 Calculation of green score using different available metrics with examples Concepts and Principles Concepts and principles
 of GAC explained in simplest manner to understand in first time Whether you re an analytical chemist food scientist
 environmental researcher or student this book offers valuable insights into implementing greener methods that meet today s
 strict regulatory standards while supporting global sustainability goals Green Analytical Chemistry in Food Analysis is more
