

# APARTMENT MANAGEMENT SYSTEM

---

## ABSTRACT

The main aim of the project is to provide utility to maintain day to day operations of apartments. This software helps them to store all transactions electronically in a system, which in turn saves lot time, money and energy.

This project is developed for a reputed construction company in the city. This company built many apartments in this city and they have a plan to construct many other apartments in the city.

This software helps to main the track records of sales, purchases, receipts, installments, advances made, maintenances and other related issues. It helps in replacing the manual system of record keeping with the modern computerized system.

## EXISTING SYSTEM

Every year the company is designing new apartments and its a difficult task to manage the records of each and every apartment in the manual system. It will not only take a lot of time but it also increases the chances of errors. Sometimes even after repeated cross checks errors are found which lead to wrong calculation of accounts and balance sheet. It creates a problem when you need details of any particular project. All these problems lead to the rise of an alternative option.

## PROPOSED SYSTEM

For managing all the transactions we are proposing a software application that takes care of all the important transactions. Implementation of this
