

## APPENDIX B

# Human Factors Investigation Guide

The purpose of this appendix is to provide those who investigate incidents in the airside environment information that may improve the quality of the data collected on the human factors involved. This appendix is not an exhaustive guide on how to conduct a safety investigation. Its focus is on improving the quality of the human factors portion of an investigation and on assisting those without formal training in investigative techniques in capturing information that will lead to the root causes of an incident.

The appendix is presented in three parts. Part 1 provides effective practices for those assigned to lead an interview. Part 2 is a checklist an investigator can use to ensure the important human performance elements are explored during an investigation. Part 3 contains investigation training resources.

### **B.1 Part 1 Overview: Keys to Conducting an Effective Investigative Interview**

When investigating the human factors of an incident, the key pieces of information will come from interviewing the people involved. This information can be used to prepare for interviews or practice the techniques when training those who may be assigned investigation duties. This guidance is adapted from Boeing's Ramp Error Decision Aid (REDA) User's Guide. The REDA tool is a structured process developed by Boeing and made available to the aviation industry for the purpose of effectively investigating events where worker performance may be a cause. This information presents considerations and techniques an investigator may employ to enhance interviews for the purpose of capturing as much information as possible on the human factors involved in an event.

### **B.2 Part 2 Overview: Investigation Checklist for Human Factors**

This checklist is intended to provide investigators with a single page (front/back) that can be taken into the field and used as a guide for capturing key human factors information related to a V/PD or any safety incident that might occur at an airport. The checklist is adapted from two investigative tools – Boeing's REDA Form Revision M (February 12, 2016) and the Department of Defense Human Factors Analysis and Classification System (DoD HFACS) Guide, Version 7.0, Revision 01.
