Duane Hampton,1971 **Nature's Spectacle** John Sheail,2014-06-17 National parks have always been an emotive and iconic symbol ever since the first parks of the modern era were created in the mid nineteenth century This book based on original research delves deeply into their character and significance and the larger context in which they developed The book celebrates the deserved attractiveness of the parks as wilderness or spectacle to millions of visitors but also emphasises how there was nothing inevitable self sustaining or without cost in their magnificence and accessibility Those early parks were a powerful unifying force as national playgrounds especially as motor transport democratised their use However they also provoked bitter conflict in their dispossession of local communities and perhaps deliberate segregation of people from scenery and wildlife That first century of national parks which concluded with the significant break of the Second World War and the subsequent development of more international approaches to conservation left an uncertain legacy It was a fragile foundation from which to build what became an integral part of today s conservation movement **Advertising & Selling** ,1930 **Advertising & Selling and the Advertising Agency** ,1930 *Advertising Fortnightly* ,1930 [Framing Nature](#) Yolonda Youngs,2024-06 Winner of the 2024 John Brinkerhoff Jackson Prize from American Association of Geographers The Grand Canyon of the Colorado River is an internationally known feature of the North American landscape attracting more than five million visitors each year A deep cultural visual and social history has shaped the Grand Canyon s environment into one of America s most significant representations of nature Yet the canyon is more than a vacation destination a movie backdrop or a scenic viewpoint it is a real place as well as an abstraction easily summoned in the minds of Americans The Grand Canyon or the idea of it is woven into the fabric of American cultural identity and serves as a cultural reference point an icon In *Framing Nature* Yolonda Youngs traces the idea of the Grand Canyon as an icon and the ways people came to know it through popular imagery and visual media She analyzes and interprets more than fourteen hundred visual artifacts including postcards maps magazine illustrations and photographs of the Grand Canyon supplemented with the words and ideas of writers artists explorers and other media makers from 1869 to 2022 Youngs considers the manipulation and commodification of visual representations and shifting ideas values and meanings of nature exploring the interplay between humans and their environments and how visual representations shape popular ideas and meanings about national parks and the American West *Framing Nature* provides a novel interpretation of how places especially national parks are transformed into national and environmental symbols **Information Service** ,1929 [The Subject Index to Periodicals](#) ,1920 **The American Angler** ,1916 *American Nurseryman* ,1927 **Copyright Law** Benedict Atkinson,2017-07-05 This volume shows how since 1950 the growth of copyright regulation has followed and enabled the extraordinary economic growth of the entertainment broadcasting software and communications industries It reproduces articles written by an extensive list of leading thinkers US scholars represented in readings include

James Boyle Lawrence Lessig Pamela Samuelson Mark Lemley Alfred Yen Julie Cohen Peter Jaszi and Eben Moglen Leading non US contributors include Alan Story Brian Fitzgerald and Peter Drahos These and other authors explain copyright origins the development of the law the theory of enclosure international trends recent developments and current and future directions Today the copyright system is often portrayed as an engine of growth and effective regulation as a predictor of economic development However critics see dangers in the expansion of intellectual property rights The articles in this volume focus principally on the digital age examining how copyright regulation is likely to affect goals of dissemination and access
