

# API Recommended Practice 2D Operation and Maintenance of Offshore Cranes

Replaces Editions 1 (December 2004), 2 (February 2005), and 3 (Product No. 940007)

This recommended practice addresses general principles for the safe installation and maintenance of offshore, geotechnically sensitive cranes on fixed or floating offshore platforms, offshore support vessels, and drilling rigs, semi-submersible drilling rigs and other types of mobile offshore drilling units (MODUs). This document also provides recommendations and instructions for periodic testing, oil cleaning, service inspection, and testing of hoisting cranes that are removed offshore.

These requirements are subject to the use and intent of the following:

- a) Offshore oil exploration and production applications. These cranes are to be designed to support up to four deck-mounted structures, hoisting deckloads, structures, or ship-lifted loads used in drilling and production operations for offshore platforms and rigs.
- b) Offshore support vessel fixed lifting devices (rated for 25,000 lbs (11,340 kg) or more) are subject to applicable vessel rules and are used to move, hoist, or install, while doing deck systems, vessel components, and other materials on the vessel. Service vessels are also used for oil field and MODU towing and applications, cranes for heavy-lift applications are included on barges, self-unloading vessels or other vessels, and are used in construction and energy operations above and below the sea surface.

Equipment as a result of such testing used only for routine lifting operations (the loads on the deck are not included in the load of the recommended practice).

Lifting devices not listed by this document should be applied, installed, and maintained in accordance with the manufacturer's recommendations.
