The Cambridge Handbook of Computing Education Research Sally A. Fincher, Anthony V. Robins, 2019-02-21 This Handbook describes the extent and shape of computing education research today Over fifty leading researchers from academia and industry including Google and Microsoft have contributed chapters that together define and expand the evidence base The foundational chapters set the field in context articulate expertise from key disciplines and form a practical guide for new researchers They address what can be learned empirically methodologically and theoretically from each area The topic chapters explore issues that are of current interest why they matter and what is already known They include discussion of motivational context implications for practice and open questions which might suggest future research The authors provide an authoritative introduction to the field which is essential reading for policy makers as well as both new and established researchers [Engineering Economic Analysis](#) Donald G. Newnan, Jerome P. Lavelle, Ted G. Eschenbach, 2000 Highly regarded by professors and students alike

Engineering Economic Analysis Eighth Edition introduces the fundamental concepts of engineering economics Written for standard engineering economics courses this bestselling volume by Donald G Newnan Jerome P Lavelle and Ted G Eschenbach covers essential time value of money principles for engineering projects and isolates the problems and decisions engineers commonly face It also examines the tools necessary to properly analyze and solve those problems Revised in 2000 the eighth edition focuses on the use of spreadsheets teaching students to use the enormous capabilities of modern software rather than relying on spreadsheet templates The majority of the chapters conclude with sections designed to help students create spreadsheets based on the material covered in each chapter The book s organization gives professors the flexibility to omit spreadsheet instruction without loss of continuity accommodating shorter courses or to require that all computations be done with spreadsheets thus preparing students to use this essential tool for real life problems
