Accompanying ISBN 9780199231591 *Constructing Organizational Life* Thomas B. Lawrence, Nelson Phillips, 2019-07-02 Across the social sciences, scholars are increasingly showing how people work to construct organizational life, including the rules and routines that shape and enable organizational activity, the identities of people who occupy organizations, and the societal norms and assumptions that provide the context for organizational action. The idea of work emphasizes the ways in which people and groups engage in purposeful, reflexive efforts rooted in an awareness of organizational life as constructed in human interaction and changeable through human effort. Studies of these efforts have identified new forms of work, including emotion work, identity work, boundary work, strategy work, institutional work, and a host of others. Missing in these conversations, however, is a recognition that these forms of work are all part of a broader phenomenon driven by historical shifts that began with modernity and dramatically accelerated through the twentieth century. This book introduces the social symbolic work perspective, which addresses this broader phenomenon. The social symbolic work perspective integrates diverse streams of research to examine how people purposefully and reflexively work to construct organizational life, including the identities, technologies, boundaries, and strategies that constitute their organizations. In this book, the authors define social symbolic work and introduce three forms: self-work, organization work, and institutional work. Social symbolic work highlights people's efforts to construct the social world and focuses attention on the motivations, practices, resources, and effects of those efforts. This book explores eight distinct streams of social symbolic work research, drawing on a broad range of examples from the worlds of business, politics, sports, social movements, and many others. It provides researchers, students, and practitioners with an integrative theoretical framework useful in understanding social symbolic work: a survey of the main forms of social symbolic work; a rich set of theoretical opportunities to inspire new studies; and practical methodological guidance for empirical research on social symbolic work. [Psychology for Social Work Theory and Practice](#) Paula Nicolson, Rowan Bayne, 2014-05-06 This new edition from a trusted author team bridges the gap between psychological theory and social work practice. Revisited and restructured to reflect the changing social work context, it provides an authoritative introduction to the key ideas, skills, and research from psychology and highlights their role within effective social work practice. Whether you are a student or a practitioner of social work, this book is a vital and

practical resource that will enhance your knowledge skills and practice New to this Edition Includes content which is of relevance across a number of social work modules Contains new chapters on reflection and the psychological context of social work organisations A range of new pedagogical features that support the practical application of the book
