## Designed for Primavera Users

Pertmaster is designed to enhance the power of Primavera planning products. It adds schedule and cost risk analysis to your existing Primavera software.

Pertmaster will simulate the performance of your project and evaluate the likelihood of finishing on time or within budget.

It reads directly from Primavera P3<sup>®</sup> and SureTrak<sup>®</sup> file formats, and integrates seamlessly with Primavera Enterprise and Teamplay<sup>®</sup>.

## Already a Primavera Monte Carlo User?

Pertmaster is a Primavera supported replacement to the Monte Carlo software. It provides enhanced functionality than that of Monte Carlo in a easy to use graphical interface:

- Links seamlessly to Primavera Enterprise and TeamPlay<sup>®</sup> (as well as P3<sup>®</sup> and SureTrak<sup>®</sup>)
- Easy to use graphical interface
- Integrated risk register
- At least 10 times faster analysis time

## Should I Be Using Risk Analysis on My Projects?

Yes, if you are running projects that are time and/or cost critical, risk analysis will help you manage your projects more effectively. It will allow you to make informed decisions, manage your project risks and make contingency plans based on straightforward reports. It will help reduce the chances of your project being late and over budget.

## Create More Realistic Schedules

While standard critical path analysis uses only a single estimate of activity duration or resource usage to calculate the project schedule, Pertmaster uses monte-carlo simulation to model a range of values and produces the most likely outcomes.

"Pertmaster's Primavera integration is excellent. I am working on a Primavera project with 5,400 activities and over 10,000 links, and Pertmaster imports it perfectly, including retained logic and lag calendars."
