thought that the adult brain is modifiable only during early stages of ontogenesis. However, neurophysiological and neuroimaging studies now indicate that the mature human brain is under certain conditions capable of substantial neuroplastic changes. Neuroplasticity reflects the ability of the human brain to alter the pattern of neural activation in response to previous experience and recent findings indicate that the effects of experience can lead to both structural as well as functional reorganization. It has been shown that pathological neuroplastic changes can be reverted, normalized, and that the modulation of the neuroplastic changes can be paralleled by improvement of the patient's status. However, there is a gap between the potential of neuromodulation, technical progress, and actual preparedness of medical personnel to provide this type of treatment. A prevalent opinion among medical professionals indicates that training programs and educational materials in neuromodulatory techniques are well needed and appreciated. Neuromodulation will focus on the description and discussion of methods currently available for invasive and non-invasive neuromodulation, their clinical potential, significance, and practical applications. In order to facilitate understanding of the topic, the initial part of the textbook will review neurophysiological systems involved in neuromodulation and will provide readers with basic principles of neuroplasticity that constitutes the rationale for neuromodulation in human medicine. Additionally, the clinical use of these techniques will be described with special regard to safety and avoidance of complications.

**Principles of Management** Rajesh Kumar  
R, 2020-01-01 Management in all business and human organization activity is simply the act of getting people together to accomplish desired goals. Management comprises planning, organizing, staffing, leading, or directing, and controlling an organization or effort for the purpose of accomplishing a goal. The Principles of Management are the essential underlying factors that form the foundations of successful management. Essentials of management make the connection between theory and concepts to actual practice by showing how managers and organizations effectively apply the basic principles of management.

*Understanding Attractive Work in a Globalized World* Urmi Nanda Biswas, Karin Allard, Anders Pousette, Annika Härenstam, 2017-11-27 This book discusses organizational values and their implications for perceived attractiveness and effectiveness of the workplace through cross-cultural research in India and Sweden. The authors provide information on how organizational values are conceptualized, presented, and perceived by manager-level employees through cases from manufacturing, information technology, IT, healthcare, and education sectors in a developing and fast-growing economy like India versus a developed and stabilized economy like Sweden. Comparative results from these two very different countries provide knowledge that can be applied to make the workplace attractive in the context of globalized business processes. The authors present corporate social responsibility (CSR) and equal opportunities for men and women in the organization (EO) as important values in making the workplace attractive, where attractiveness is conceived in terms of organizational commitment and employees' intention to leave. The two selected values are particularly important as India is the first country in the world to come up with a mandatory CSR law, whereas Sweden has a long history of CSR and EO. The

book demonstrates how work organizations in both countries are promoting these values to meet the challenges of attraction and retention of employees The findings in this book are based on data gathered from various sources and sample groups in India and Sweden The book generates insight and valuable information for researchers of organizational psychology human resource management cross cultural management as well as for work managers and HR professionals
