Written by a renowned neuroscientist and a pioneering tech strategist, this essential guide cuts through the noise to reveal how the most successful leaders will partner with AI to architect tomorrow's business landscape rather than merely react to it. The authors present a revolutionary perspective: AI isn't replacing humanity; it's humanity evolving. As the purest distillation of our collective wisdom, knowledge, and creativity across generations, AI offers us a mirror that reflects our potential when properly engaged. But capturing this opportunity requires our own development in parallel with technological advancement. Through detailed case studies of how successful businesses are capturing AI, actionable

frameworks and strategic insights you'll discover how to position your organisation at the forefront of the AI human partnership revolution. It provides practical methods to develop both technological and human knowledge simultaneously and ways to create competitive advantage through intelligent business models seeing sentience as the solution and not the problem.
