## **Colour Atlas Paediatric Facial:**

Colour Atlas of Paediatric Facial Diagnosis Trevor P. Mann, 1989 This is a most valuable contribution to paediatric diagnosis which highlights the importance of this essentially visual method in the study of practical paediatric problems Each topic consists of a concise informative and scholarly text supported where appropriate by key references many giving a historical perspective There are over 400 high quality colour plates with descriptive legends many of which analyse in some detail the individual features of a face regarded as abnormal or dysmorphic often a necessary practical prerequisite to establishing a definitive diagnosis The importance of recognising subtle expressive changes and facial signals is considered in relation to emotional disorders Throughout the book is leavened by tables listing important diagnostic clues cranio facial or otherwise

Verbov, W.N. Morley, 2012-12-06 We have felt for some years that an atlas of paediatric dermatology merited a place in the world dermatological literature. Non dermatologists find skin conditions difficult to describe and diagnose and this may be even more difficult in children. We usually rely on the parents for a history in children although many conditions can be spotted and diagnosed. In this atlas we have tried to illustrate conditions seen regularly in our clinics as well as some seen more rarely but which are nevertheless important to recognize. We have limited the number of illustrations in order to produce a realistically priced book and thus it has not always been easy to decide what to include and what to omit. However we hope that we have produced a reasonably comprehensive work. We hope that this atlas will have a wide appeal both at home and abroad. It is a book either to read or to browse through. It is intended for senior medical students, family practitioners and for trainees both in dermatology and in paediatrics. We would like it actually taken to skin clinics to be available for instant perusal and to be on hand in the paediatric ward. We have said comparatively little about treatment because this alters regularly and often varies in different centres and because we do not think that an atlas is the place for this.
