## CHAPTER REVIEW

1. What will the workplace of the future look like, and what skills does the labor force need to adapt to rapid change and uncertainty? (L.O. 1)

**Answer:**

Technologies in many disciplines are rapidly evolving and transforming how we work and communicate. A renowned economist, the World Economic Forum's co-founder Klaus Schwab, has described the age we are entering as the Fourth Industrial Revolution. Robots, automation, and artificial intelligence (AI) are already radically reshaping and even destroying some occupations. Many tasks formerly performed by humans can be executed by machines. Experts estimate that close to half of all present jobs will disappear in the next decade, although new jobs are likely to emerge.

Employers say that they need a well-trained workforce with a broad range of skills, including superior interpersonal skills, also called emotional intelligence, such as communication, teamwork, and punctuality but also logical reasoning and critical-thinking skills.

2. What does it mean that the office of the future is mobile and always on? (L.O. 1)

**Answer:**

In a global economy in which corporations own far-flung operations around the world, a networked, information-driven workforce never goes off duty. The 24/7 workplace operates around the clock, with managers, staff, and teams always staying connected to share information when needed, wherever they may be, and address issues when they arise.
