**Development Economics** Gérard Roland, 2016-05-23 Gerard Roland's new text Development Economics is the first undergraduate text to recognize the role of institutions in understanding development and growth Through a series of chapters devoted to specific sets of institutions Roland examines the effects of institutions on growth property rights market development and the delivery of public goods and services and focuses With the most comprehensive and up to date treatment of institutions on development Roland explores the important questions of why some countries develop faster than others and why some fail while others are successful

**Development Economics** Debraj Ray, 1998-01-12 A landmark textbook on development economics The study of development in low income countries is attracting more attention around the world than ever before Yet until now there has been no comprehensive text that incorporates the recent huge strides made in the subject Development Economics does precisely that in a clear rigorous and elegant fashion Debraj Ray one of the most accomplished theorists in development economics today presents in this book a synthesis of recent and older literature in the field and raises important questions that will help to set the agenda for future research He covers such vital subjects as theories of economic growth economic inequality poverty and undernutrition population growth trade policy and the markets for land labor and credit A common point of view underlies the treatment of these subjects that much of the development process can be understood by studying factors that impede the efficient and equitable functioning of markets Diverse topics such as the new growth theory moral hazard in land contracts information based theories of credit markets and the macroeconomic implications of economic inequality come under this common methodological umbrella The book takes the position that there is no single cause for economic progress but that a combination of factors among them the improvement of physical and human capital the reduction of inequality and institutions that enable the background flow of information essential to market performance consistently favor development Ray supports his arguments throughout with examples from around the world The book assumes a knowledge of only introductory economics and explains sophisticated concepts in simple direct language keeping the use of mathematics to a minimum Development Economics will be the definitive textbook in this subject for years to come It will prove useful to researchers by showing intriguing connections among a wide variety of subjects that are rarely discussed together in the same book And it will be an important resource for policy makers who increasingly find themselves dealing with complex issues of growth inequality poverty and social welfare

**Development Economics** Schaffner, 2013-10-29 **Handbook of Development Economics** Jere Behrman, T. N. Srinivasan, 1995 Data and econometric tools for development analysis Angus Deaton Human Resources Empirical modeling of household and family decisions John Strauss Applied general equilibrium models for policy analysis Jan Willem Gunning Savings credit and insurance Timothy Besley Technological

change and technology strategy Robert E Evenson Institutions and economic development Justin Yifu Lin Poverty institutions and the environmental resource base Partha Dasgupta      **The Process of Economic Development** James M. Cypher, 2020-12-30 The fifth edition of *The Process of Economic Development* offers a thorough and up to date treatment of development economics It has been extensively revised throughout reflecting the most recent developments in research and incorporating the latest empirical data as well as key theoretical advances and many new topics The world has seen vast economic growth in China economic transformation in India new challenges in Latin America rapid economic progress in Southeast Asia and the deepening impact of environmental issues such as climate change This new edition addresses all these critical issues as well as the pivotal role of the state where China s capacity is contrasted with that of African states Transnational corporations reliance on low wage manufacturing and labor arbitrage is featured in the book Agricultural policy extensively explored remains crucial as does the promotion of industrialization This fifth edition offers a state of the art analysis of these essential themes and many others Numerous case studies and issue focuses have been integrated with sundry central topics Neoclassical theories and applications including a timely exploration of behavioral economics are both rigorously and accessibly explicated Cypher s comprehensive account remains the development economics text par excellence as it takes a much more practical hands on view of the issues facing the developing countries than other overly mathematical texts This book is unique in its scope and in the detailed attention it gives to a vast range of ideas including pioneering developmentalist and heterodox formulations Distinct institutional structures are examined within their historical contexts This landmark text will continue to be an invaluable resource for students teachers and researchers in the fields of development economics and development studies
