Material London, ca. 1600 Lena Cowen Orlin, 2012-10-19

Between 1500 and 1700 London grew from a minor national capital to the largest city in Europe. The defining period of growth was the period from 1550 to 1650, the midpoint of which coincided with the end of Elizabeth I's reign and the height of Shakespeare's theatrical career. In *Material London ca. 1600*, Lena Cowen Orlin and a distinguished group of social intellectual, urban architectural, and agrarian historians, archaeologists, cultural anthropologists, and literary critics explore the ideas, structures, and practices that distinguished London before the Great Fire, basing their investigations on the material traces in artifacts, playtexts, documents, graphic arts, and archaeological remains. In order to evoke material London ca. 1600, each scholar examines a different aspect of one of the great world cities at a critical moment in Western history. Several chapters give broad panoramic and authoritative views: what architectural forms characterized the built city around 1600; how the public theatre established its claim on the city; how London's citizens incorporated the new commercialism of their culture into their moral views. Other essays offer sharply focused studies: how Irish mantles were adopted as elite fashions in the hybrid culture of the court; how the city authorities clashed with the church hierarchy over the building of a small bookshop; how London figured in Ben Jonson's exploration of the role of the poet. Although all the authors situate the material world of early modern London—its objects, products, literatures, built environment, and economic practices—in its broader political and cultural contexts, provocative debates and exchanges remain both within and between the essays as to what constitutes material London ca. 1600.

[Reading Matter](#) Arthur Asa Berger, 2008-10-01

To be civilized involves, among other things, making, using, and buying objects. Although speculation on the significance of objects often tends to be casual, there are professionals—anthropologists, historians, semioticians, Marxists, sociologists, and psychologists—who analyze material culture in a systematic way and attempt to elicit from it reliable information about people, societies, and cultures. One reason that analyzing objects has been problematical for scholars is the lack of a sound methodology governing multidisciplinary research. *Reading Matter* addresses this problem by defining a comprehensive set of methodological approaches that can be used to analyze and interpret material culture and relate it to personality and society. Berger offers discussions of the main concepts found in semiotic, historical, anthropological, psychoanalytic, Marxist, and sociological analysis. He provides practical descriptions of the working methods of each discipline and demarcates their special areas of investigation. Berger's lively discussions include a wealth of illustrative examples that help to clarify the complex and often difficult theories that underlie interpretations of material culture. In the second part of his analysis, Berger uses these disciplines to investigate one subject: fashion, and an important aspect of fashion: blue jeans, and what the author calls the denimization phenomenon. Here he shows how different methods of reading material culture end up with different perspectives on things, even when they are dealing with the same topic. The

author's focus is on the material culture of post-literate societies and cultures both contemporary and historical. This comparative approach enables the reader to trace the evolution of objects from past to present or to see how American artifacts spread to different cultures acquiring a wholly new meaning in the process. Reading Matter is an important contribution to the study of popular culture and social history. It will be of interest to sociologists, anthropologists, and cultural historians.

Arthur Asa Berger is professor emeritus of broadcast and electronic communication arts at San Francisco State University and series editor of Transaction's Communication and Mass Culture and Humor Studies series. He is the author of many books including *Manufacturing Desire* and *Agitpop*.

Civilization and Capitalism, 15th-18th Century, Vol. III

Fernand Braudel, 1992-12-23. By examining in detail the material life of pre-industrial peoples around the world, Fernand Braudel significantly changed the way historians view their subject. Volume I describes food and drink, dress and housing, demography and family structure, energy and technology, money and credit, and the growth of towns.

Biography of a Hacienda, Elizabeth Terese Newman, 2014-04-17. Winner James Deetz Book Award, Society for Historical Archaeology. *Biography of a Hacienda* is a many-voiced reconstruction of events leading up to the Mexican Revolution and the legacy that remains to the present day. Drawing on ethnohistorical, archaeological, and ethnographic data, Elizabeth Terese Newman creates a fascinating model of the interplay between the great events of the Revolution and the lives of everyday people. In 1910, the Mexican Revolution erupted out of a century of tension surrounding land ownership and control over labor. During the previous century, the elite ruling classes acquired ever-increasingly large tracts of land, while peasants saw their subsistence and community independence vanish. Rural working conditions became so oppressive that many resorted to armed rebellion. After the war, new efforts were made to promote agrarian reform, and many of Mexico's rural poor were awarded the land they had farmed for generations.

Weaving together fiction, memoir, and data from her fieldwork, Newman reconstructs life at the Hacienda San Miguel Acocotla, a site located near a remote village in the Valley of Atlixco, Puebla, Mexico. Exploring people's daily lives and how they affected the buildup to the Revolution and subsequent agrarian reforms, the author draws on nearly a decade of interdisciplinary study of the Hacienda Acocotla and its descendant community. Newman's archaeological research recovered information about the lives of indigenous people living and working there in the one hundred years leading up to the Mexican Revolution. Newman shows how women were central to starting the revolt, and she adds their voices to the master narrative. *Biography of a Hacienda* concludes with a thoughtful discussion of the contribution of the agrarian revolution to Mexico's history and whether it has succeeded or simply transformed rural Mexico into a new global hacienda system.
