France and asks why at the present historical juncture conditions of work can push individuals to take their own lives During  
the 2000s France experienced what commentators have described as a suicide epidemic whereby increasing numbers of  
workers in the face of extreme pressures of work chose to kill themselves The book analyses a corpus of testimonial material  
linked to 66 suicide cases across three large French companies during the period from 2005 to 2015 It aims to consider what  
the extreme and subjective act of self killing narrated in suicide letters can tell us about the contemporary economic order  
and its impact on flesh and blood bodies What do rising work related suicides reveal about conditions of human labour in the  
twenty first century Does neoliberal economics condition a desire for suicide How do suicidal individuals describe the causes  
and motivations of their act Combining critical perspectives from sociology history testimony studies economics cultural
