English Language Learners and the New Standards Margaret Heritage,Aída Walqui,Robert Linqianti,2020-01-15 In English Language Learners and the New Standards three leading scholars present a clear vision and practical suggestions for helping teachers engage ELL students in simultaneously learning subject area content analytical practices and language This process requires three important shifts in our perspective on language and language learning from an individual activity to a socially engaged activity from a linear process aimed at correctness and fluency to a developmental process focused on comprehension and communication and from a separate area of instruction to an approach that embeds language development in subject area activities In English Language Learners and the New Standards the authors Clarify the skills and knowledge teachers need to integrate content knowledge and language development Show how teachers can integrate formative assessment in ongoing teaching and learning Discuss key leverage points and stress points in using interim and summative assessments with ELLs Provide classroom vignettes illustrating key practices Finally the authors explain the theories and research that underlie their vision and examine the role of policy in shaping pedagogy and assessment for ELL students

Historiography of Mathematics in the 19th and 20th Centuries Volker R. Remmert,Martina R. Schneider,Henrik Kragh Sørensen,2016-12-08 This book addresses the historiography of mathematics as it was practiced during the 19th and 20th centuries by paying special attention to the cultural contexts in which the history of mathematics was written In the 19th century the history of mathematics was recorded by a diverse range of people trained in various fields and driven by different motivations and aims These backgrounds often shaped not only their writing on the history of mathematics but in some instances were also

influential in their subsequent reception During the period from roughly 1880 1940 mathematics modernized in important ways with regard to its content its conditions for cultivation and its identity and the writing of the history of mathematics played into the last part in particular Parallel to the modernization of mathematics the history of mathematics gradually evolved into a field of research with its own journals societies and academic positions Reflecting both a new professional identity and changes in its primary audience various shifts of perspective in the way the history of mathematics was and is written can still be observed to this day Initially concentrating on major internal universal developments in certain sub disciplines of mathematics the field gradually gravitated towards a focus on contexts of knowledge production involving individuals local practices problems communities and networks The goal of this book is to link these disciplinary and methodological changes in the history of mathematics to the broader cultural contexts of its practitioners namely the historians of mathematics during the period in question *Middle Grades Research Journal* Frances R.
