- a. Cocci are roughly spherical in shape. They can exist individually but may also come in other arrangements like:
  - i. Diplococcic – cocci divides and remains in pairs
  - ii. They may also exist in long chains of cocci which divide and remain attached to each other, eg. *Streptococcus*, *Enterococcus*
  - iii. They can exist in clusters of cocci, eg. *Micrococcus*
- b. Rods. This is often referred to as bacillus (plural bacilli)
- c. Bacteria can also be unusually shaped. The *Actinomyces* form longhyphae that may branch to produce a network called mycelium
- d. Bacteria may also form rods twisted into spirals or helices which are called spirilla if rigid or spirochetes, if flexible.
- e. Some bacteria are pleomorphic – showing variable shapes.
- f. Some bacteria could also be flat or square shaped

### IDENTIFICATION OF BACTERIA

Identification of bacteria (preliminary or conclusive) can be based on a number of factors namely:

- a. Microscopic examination of specimen
- b. Growth study and biochemical characteristics of isolates
- c. Immunologic tests that detects antibodies and antigens
- d. Bacteriophage typing
- e. Molecular methods

**Migration, Diaspora and Information Technology in Global Societies** Leopoldina Fortunati, Raul Pertierra, Jane Vincent, 2013-03-01 Migrants and diaspora communities are shaped by their use of information and communication technologies. This book explores the multifaceted role played by new media in the re-location of these groups of people, assisting them in their efforts to defeat nostalgia, construct new communities and keep connected with their communities of origin. Furthermore, the book analyses the different ways in which migrants contribute along with natives in co-constructing contemporary societies, a process in which the cultures of both groups are considered. Drawing on contributions from a range of disciplines including sociology, anthropology, psychology and linguistics, it offers a more profound understanding of one of the most significant phenomena of contemporary international societies: the migration of nearly a billion people worldwide and the relationship between technology and society.

**Class, ethnicity and religion in the Bengali East End** Sarah Glynn, 2016-05-16 This exploration of one of the most concentrated immigrant communities in Britain combines a fascinating narrative history, an original theoretical analysis of the evolving relationship between progressive left politics and ethnic minorities, and an incisive critique of political multiculturalism. It recounts and analyses the experiences of many of those who took part in over six decades of political history that range over secular nationalism, trade unionism, black radicalism, mainstream local politics, Islamism and the rise and fall of the Respect Coalition. Through this Bengali case study and examples from wider immigrant politics, it traces the development and adoption of the concepts of popular frontism, revolutionary stages theory and identity politics. It demonstrates how these theories and tactics have cut across class-based organisation and acted as an impediment to addressing socio-economic inequality, and it argues for a left materialist alternative. It will appeal equally to sociologists, political activists and local historians.
