Solving Large Scale Rational Expectation Models Jess Gaspar,1997 Observational Agency and Supply-side Econometrics Tomas J. Philipson,1997 A central problem in applied empirical work is to separate out the patterns in the data that are due to poor production of the data such as e g non response and measurement errors from the patterns attributable to the economic phenomena studied This paper interprets this inference problem as being an agency problem in the market for observations and suggests ways in which using incentives may be useful to overcome it The paper discusses how wage discrimination may be used for identification of economic parameters of interest taking into account the responses in survey

supply by sample members to that discrimination Random wage discrimination alters the supply behavior of sample members across the same types of populations in terms of outcomes and thereby allows for separating out poor supply from the population parameters of economic interest Empirical evidence for a survey of US physicians suggests that survey supply even for this wealthy group is affected by the types of wage discrimination schemes discussed in a manner that makes the schemes useful for identification purposes Using such schemes to correct mean estimates of physician earnings increases those earnings by about one third
