A Textbook of Estimating and Costing (Civil) R.C.Kohli,2012-07 The book is written in simple language and self explanatory reflects the image of the author's long experience in field and teaching as well The new edition of the book is a composite unit complete in itself The presentation of the matter is simple and excellent

Membrane Biological Reactors: Theory, Modeling, Design, Management and Applications to Wastewater Reuse - Second Edition Faisal I. Hai,Kazuo Yamamoto,Chung-Hak Lee,2018-10-15 The MBR market continues to experience a massive growth The best practice in the field is constantly changing and unique quality requirements and management issues are regularly emerging The second edition of Membrane Biological Reactors Theory Modeling Design Management and Applications to Wastewater Reuse comprehensively covers the salient features and emerging issues associated with the MBR technology The book provides thorough coverage starting from biological aspects and fundamentals of membranes via modeling and design concepts to practitioners perspective and good application examples In the second edition the chapters have been updated to cover the recently emerged issues Particularly the book presents the current status of the technology including market drivers restraints and development trend Process fundamentals both the biological and membrane components have received in depth coverage in the new edition A new chapter has been added to provide a stronger focus on reuse applications in general and the decisive role of MBR in the entire reuse chain The second edition also comes with a new chapter containing practical design problems to complement the concepts communicated throughout the book Other distinguishing features of the new edition are coverage of novel developments and hybrid processes for specialised wastewaters energy efficiency and sustainability of the process aspects of MBR process automation and recent material on case studies The new edition is a valuable reference to the academic and professional community and suitable for undergraduate and postgraduate teaching in Environmental Engineering Chemical Engineering and Biotechnology

Sustainable eco-technologies for water and wastewater treatment Eldon Rene ,Li Shu ,Veeriah Jegatheesan ,2020-03-15 One of the major challenges in the world is to provide clean water and sanitation for all With 3% fresh water reserves in the earth there are more than 1 billion people who still lack access to clean drinking water The declining water quality has not only reduced the life expectancy of humans but it has also contributed to the deleterious negative impacts on aquatic marine life flora fauna and the ecosystem However with rapid technological advancements and the availability of advanced scientific instruments there has been substantial improvement in the design and operation of water and wastewater treatment systems Recently these sustainable eco technologies have been designed and operated to offer the following advantages i a smaller footprint ii less maintenance iii 99% removal of contaminants iv provides the option for resource recovery v less energy consumption vi minimal use of chemicals and vii less investment and operational costs This book highlights the technologies used for the removal of pollutants such as dyes uranium cyanotoxins faecal contamination and P N compounds from water environments and shows

that ecotechnologies are becoming more and more important and playing critical role in removing a wide variety of organic and inorganic pollutants from water In Focus a book series that showcases the latest accomplishments in water research Each book focuses on a specialist area with papers from top experts in the field It aims to be a vehicle for in depth understanding and inspire further conversations in the sector

Integrated Water Resources Management in Water-scarce Regions Stefan Liehr, Johanna Kramm, Alexander Jokisch, Katharina Müller, 2018-03-15 The research project CuveWaters developed and implemented adapted technologies and accompanying measures to support the national process towards an Integrated Water Resources Management IWRM The aim is to give people in the Cuvelai Etosha Basin reliable access to clean water over the long term thus enhancing their livelihood and health and to create job opportunities IWRM relies on solutions that use various sources types and qualities of water for different purposes CuveWaters implemented pilot plants for rain and floodwater harvesting groundwater desalination as well as facilities for sanitation and water reuse Technical components of the project were framed by societal and scientific components Integrated Water Resources Management in Water scarce Regions provides a comprehensive view on the complexity and interconnectedness of findings and conclusions regarding the principle strategic approach within the CuveWaters project s concept The book aims to present the work of technical social and natural scientists but also of media professionals It gives thematically focussed details on the three technology based solutions which go beyond mere technical considerations and embed this into the overarching process towards IWRM in Namibia Finally it critically addresses lessons learnt and limits of projects in the context of research for implementation This book is of great value to experts professionals and also students and academics in the areas of water management technology development and implementation and transdisciplinary science *Standard & Poor's Stock Reports*, 2003
