Epz Crash Course in Creativity Brian Clegg,2005-02-01 **Crash Course in Creativity** Brian Clegg,2002 Ideas on Demand Miliind Harrdas,2021 Do you often find yourself saying creativity is not my cup of tea Well due to this misplaced belief you are losing a lot of opportunities to accelerate your success Creativity is a powerful tool that can get you 10x results Creativity is a skill and like any other skill can be learned by practicing it right Ideas on demand will show you how to rewire your brain become an idea machine 10x your impact and achieve your aspirations back cover Ideas on Demand 2022: A Crash Course on Creativity Bust Creativity Blocks 10x Your Ideas Become an Ideas Machine The Books of Pamex,2022-09-13 Each one of us is born creative And then one day we went to school Our formal education began with formally muzzling our creativity By the time we completed our education the process of de creativization was complete The whole process is so effective that whenever we come across creative people we consider them as gifted individuals The reality is that all of us were as gifted as the creative ones The only difference is somehow they managed to survive the de creativizing effect of formal education Every child is an artist The problem is how to remain an artist once he grows up Pablo Picasso I was no different I was blissfully unaware leading a perfectly uncreative life Then a jolt came in the form of a most unexpected promotion in my corporate career Let me explain I started my career as a medical representative But somewhere deep inside I believed that the right place for me was in marketing But I had neither the qualification nor the required experience Hence I focused on my sales career rose to a managerial position and continued to move up in my career ladder Meanwhile I also added a management qualification Again the thought of moving into marketing came to me but by then I had already moved up the ladder as a line manager I thought shifting to marketing would mean starting from scratch at the lowest marketing position At that time I didn't want to let go of my hard earned middle management position Besides I was performing well and already expecting my next promotion Soon the promotion happened But it came with a big surprise I was promoted to marketing manager without any prior marketing experience It was like a dream come true Those were the days when FMCG ad agencies had not yet entered the pharmaceutical arena Hence to be a successful pharma marketer creativity was a mandatory prerequisite As a marketing head I had a bright team of brand managers who expected me to help them provide creative differentiating ideas Not just my team but my seniors too had high expectations from me With the pressure of such high expectations I could think of only mediocre run of the mill ideas My reputation was at stake I had only two choices be creative or be regarded as a failure in my new role as a marketer I opted for the first one Once I made the decision I chased creativity with an intense focus I searched and consumed every word I came across on the subject of creativity and innovation and tried to apply it to my day to day work Regardless of the quality of ideas I focussed on churning out ideas every single day Initially the results were pathetic Fortunately I had no choice but to keep trying Gradually the quality of

ideas started improving In the process I learned the art of connecting dots My ideas started getting better Even others began to notice the difference I had crossed the first barrier Finally the real breakthrough came when I learned to identify and challenge the hidden assumptions that stop everyone from getting breakthrough ideas There is a lot of interesting stuff on shattering assumptions that awaits you in this book Fast forward to today Since 2008 my creative agency helps pharmaceutical companies build big brands I also offer strategic consulting to organizations looking for innovative ideas to stay ahead of the competition Today my sole source of livelihood is strategy marketing creativity and innovation This book has anecdotes stories about great minds case studies scientific evidence and many powerful techniques and exercises Besides I have put 20 years of my first hand experience and learning into it All this is to help you generate Ideas on Demand which is the promise of this book Let s get started
