The use of technology in training for industry, government, health care, and education has increased dramatically in recent years. It describes the instructional design process, scriptwriting, multimedia authoring, media production, and new technology based training delivery systems. Among the many topics covered are training delivery trends, the training design process, defining the audience, reproduction, program design, and production design, scripting, and storyboarding, uses of light and color. Written by a highly experienced training consultant, Designing and Producing Media Based Training will provide training professionals, corporate managers, multimedia designers and producers, and videomakers with tools for designing effective technology based training programs.
