**Innovation in the Public Sector**, 2017

The public sector looms large economically both as a regulator of private economic activity and as a producer and consumer in its own right. The rewards to innovation in the public sector can be huge but the obstacles can be formidable. In this book, policy makers and scholars from eight countries and two international organisations offer their unique insights on where the challenges lie and how they can be overcome. This publication is part of an ongoing series highlighting some of the results of the UNECE Subprogramme on Economic Cooperation and Integration. The objective of the Subprogramme is to promote a policy financial and regulatory environment conducive to economic growth, knowledge base development and higher competitiveness in the UNECE region. Back cover **Policy Innovation in State Government** David C. Nice, 1994

Although it sometimes seems that governmental policies rarely change, American state governments do adopt innovations. This study considers why the states try new approaches to policy problems. It analyzes innovations from campaign financing and sunset laws to public transportation and regulating sexual behavior seeking to determine what forces produce policy changes. **Policy Innovation in State Government** the result of studies considering individual innovations is an effort to make sense of a striking finding: State characteristics that largely accounted for some changes were of no value in accounting for others. Nice proposes a general theory based on a state's problem, environment, resources and orientation to government power. This is a book that examines an important question, offers an interesting theory and makes a reasonable effort to test it. It will be valuable for those interested in state government, public policy making, intergovernmental relations and public administration. **Abhigyan**, 1997 **Science & Public Policy**, 2006 Innovation and Institutions Steven Casper, Frans van Waarden, 2005. Innovation and Institutions is an extensive elaboration on the make up of systems of innovation. It examines why some countries are more innovative than others, why national styles of innovation differ and goes on to explore why some countries make radical innovations but fail to successfully market them whilst others making incremental innovations have more commercial success. The book draws on a variety of different literatures and perspectives to illustrate the organizational and institutional dimensions of national innovation systems. Literatures discussed include the economics of innovation, organizational sociology, administrative science, institutional economics, organizational learning, network analysis, business systems, economic governance and regulation. This truly interdisciplinary book will be invaluable to academics and researchers focussing on innovation in a wide range of fields. It will also strongly appeal to practitioners and policymakers concerned with innovation.
