**Ethnography for Designers** Galen Cranz,2016-02-26 Ethnography for Designers teaches architects and designers how to listen actively to the knowledge people have about their own culture This approach gives structure to values and qualities It does this by noting the terms and underlying structure of thought people use to describe aspects of their culture By responding to underlying cognitive patterns the architect can both respond to the user and interpret creatively Thus ethno semantic methods can help designers to enhance their professional responsibility to users and at the same time to feel fulfilled creatively This book is a practical guide for those teaching social factors and social research methods to designers and for those using these methods in practice      *The WISE Journal* Klaudio Muca,Carsten Primdahl,2022-03-09 The WISE Journal investigates the dynamic relationship between architecture humans and human activities in learning and work environments The publication brings into conversation different scientific disciplines and some of the world s foremost thinkers This extensive mixed media journal offers its readers food for thought on how to translate this cross disciplinary exploration into fulfilling long lasting architecture intentionally stimulating spaces that support productivity learning and well being The e book contains a series of interviews in video and podcast format alongside numerous illustrations that support articles case studies and essays For in depth readers the publication provides hundreds of pages of text with thorough references to peer reviewed articles Education institutions should remember that their ultimate customer is not the students nor their parents but society at large The WISE Journal beautifully demonstrates the intricate impact that education has on space skills and society Ben Nelson Founder Minerva University The WISE Journal has identified a set of important topics whose relationship to one another can benefit from appropriate examples and thoughtful reflections Howard Gardner Harvard Graduate School of Education The WISE Journal brings into conversation the many diverse disciplines involved in the design of intentional spaces This cross pollination of research theory insights and practice is essential to advancing architecture for wellbeing and lifelong learning Susan Magsamen Executive Director International Arts Mind Lab

[Assessing Library Space for Learning](#) Susan E. Montgomery,2017-08-01 With the surge in electronic access to the library

s resources there has been an ongoing discussion about the need for a physical library building On a college or university campus the library is a destination for its users Students faculty and staff go to the library for various reasons Their usage makes the academic library a valuable learning space on campus However not much is known about how the library space contributes to user learning In *Assessing Library Space for Learning* chapters discuss library usage at academic institutions and how that usage is an integral part of the student learning experience Included are the perspectives of an architect who is tasked with designing library spaces with learning in mind a psychologist whose professional research focuses on the concept of place and a dynamic group of academic librarians who are dedicated to making the library conducive to the needs of their learners This book is a combination of theory practical and research based chapters with an overall focus on the intersection of library space and learning The authors demonstrate the importance of the library space in our users lives In addition the authors discuss the importance of determining ways to learn how library space contributes to user learning Readers will gain an understanding of the library space as a valuable learning space and the steps librarians need to take to assess learning in the academic library

**Analogical Thinking in Architecture** Jean-Pierre Chupin,2023-07-27 This book provides an in depth exploration of the rich and persistent use of analogical thinking in the built environment Since the turn of the 21st century design thinking has permeated many fields outside of the design disciplines It is expected to succeed whenever disciplinary boundaries need to be transcended in order to think outside the box This book argues that these qualities have long been supported by

analogical thinking an agile way of reasoning in which think the unknown through the familiar The book is organized into four case studies the first reviews analogical models that have been at the heart of design thinking representations from the 1960s to the present day the second investigates the staying power of biological analogies the third explores the paradoxical imaginary of analogous cities as a means of integrating contemporary architecture with heritage contexts while the fourth unpacks the critical and theoretical potential of linguistic metaphors and visual comparisons in architectural discourse Comparing views on the role of analogies and metaphors by prominent voices in architecture and related disciplines from the 17th century to the present the book shows how the analogical world of the project is revealed as a wide open field of creative and cognitive interactions These visual and textual operations are explained through 36 analogical plates which can be read as an inter text demonstrating how analogy has the power to reconcile design and theories The Journal of Aesthetic Education ,1993 Includes special issues The Impact of Teacher Input in the Design Process of New Schools Shelly Lynn Irving,2002 National Union Catalog ,1981 Includes entries for maps and atlases Enhancing Value in Design Decisions Stephen J.
