systems trading algorithms and other artificial intelligence systems are commonly used for both industrial and personal purposes The question of legal liability arises when something goes wrong e g the unmanned vehicle is involved in a car accident the surgical system is involved in a surgical error or the trading algorithm is involved in fraud etc Who is to be held liable for these offenses the manufacturer the programmer the user or perhaps the artificial intelligence system itself The concept of liability for crimes involving artificial intelligence systems has not yet been widely researched Advanced technologies are forcing society to face new challenges both technical and legal The idea of liability in the specific context of artificial intelligence systems is one such challenge that should be thoroughly explored **Mathematical and computational Models** G.
