

EN ISO 6789:2017 REGULATION

- Torque tools are subject to verification and certification every twelve months or every 5000 tightenings
- With the new EN ISO 6789: 2017 standard, torque tool verification is no longer carried out at 20%, 60%, 100% of the torque maximum but at the minimum value of the indicated measurement range, at 60% and at 100% of the maximum value
- These changes make it possible to check compliance of the torque wrench in the entire measuring range indicated, and not just in a portion of it
