The Time-Saver's Workout John Little, 2019-04-09 There is something terribly wrong with the state of exercise as we know it presently. Sales of treadmills, running shoes, gym memberships, and yoga classes are at an all-time high, but so too are our national levels of obesity and type II diabetes. Ever since the 1960s, the exercising public has been told to stretch for flexibility and to perform low-intensity, steady-state aerobic exercise for their cardiovascular systems, and some form of resistance training to keep their muscles strong. With regard to diet, they have been told to restrict or omit macronutrients such as fats and carbohydrates, and lots of other advice with regard to calorie counting. Could it be that this information, however well-intended, was mistaken? And is it really necessary to devote so much time to the pursuit? Fitness researcher and pioneer John Little has spent more than twelve years researching the actual science underpinning our most prevalent beliefs about exercise and has come away from the enterprise convinced that we need an entirely new paradigm, one that would involve reliance on briefer workouts. He presents this revolutionary new approach in *The Time Saver's Workout*. Among the fascinating revelations presented in this book, certain types of exercise can actually make you less healthy and fatter. Taking large doses of food supplements might actually shorten your life and put you at greater risk for disease. Stretching to become more flexible or to recover quicker from injury has been found to do neither of these things. Resistance training, once considered to be the weak sister of exercise, is now looking like the best form of exercise one should engage in. The new protocols that Little exposes offer a far safer alternative for those looking to become stronger, fitter, and healthier without spending their lives in the gym.

Home Exercises For Everyone David Nordmark, 2010-06-20 Discover How To Unlock Your True Potential With Bodyweight Exercises. The secret to looking better, feeling stronger and living longer is to train naturally just like the animals in nature. Any animal you can think of is far healthier than any human being. How do they do it? Their secret is that by instinct they exercise everyday using nothing but their own body and bodyweight. Don't you think there is a lesson there for people as well? Or put it this way: Think of the physiques you really admire. I suspect what you like about them is that they possess natural muscle and real strength. Gymnasts, dancers and martial artists are all examples of this. What unites them all? Like the animals in nature they all use some form of bodyweight training to achieve their perfect bodies. Don't you think it would be wise to follow their example? If this makes sense to you then *Home Exercises For Everyone* is the book for you.
