The Oxford Handbook of Global Policy and Transnational Administration Diane Stone, Kim Moloney, 2019-01-10 Global policy making is unfurling in distinctive ways above traditional nation state policy processes New practices of transnational administration are emerging inside international organizations but also alongside the trans governmental networks of regulators and inside global public private partnerships Mainstream policy and public administration studies have tended to analyse the capacity of public sector hierarchies to globalize national policies By contrast this Handbook investigates new public spaces of transnational policy making the design and delivery of global public goods and services and the interdependent roles of transnational administrators who move between business bodies government agencies international organizations and professional associations This Handbook is novel in taking the concepts and theories of public administration and policy studies to get inside the black box of global governance Transnational administration is a multi actor and multi scalar endeavour having manifestations depending on the policy issue or problems at the local urban sub regional sub national regional national supranational supra regional transnational international and global scales These scales of local and global are not neatly bounded and nested spaces but are articulated together in complex patterns of policy activity These transnational patterns represent a reinvigoration of public administration and policy studies as the Handbook authors advance their analysis beyond the methodological nationalism of the nation state

Alcohol and Alcohol-related Diseases Sebastian Mueller, Markus Heilig, 2023-10-24 Alcohol is one of the major risk factors for negative health outcomes worldwide. It accounts for more than 60 alcohol-related diseases ranging from addiction through liver cirrhosis to cancer. Collectively, these conditions account for mortality and morbidity that make alcohol use one of the leading preventable causes of disability-adjusted life years (DALYs) lost globally. In this book, an international faculty covers all aspects of alcohol-related disorders ranging from addiction, alcohol use disorders (AUD), to alcohol-related diseases of other organs such as liver, heart, or cancer. A special focus is to reach out to primary care physicians who are in the front line of this major health problem. The book also provides an update for addiction specialists as well as specialists in internal medicine, gastroenterology, and hepatology. The book is divided into sections that include epidemiology, alcohol use disorders, and addiction, alcohol-related liver disease, alcoholic hepatitis, primary care, and interdisciplinary approaches and other alcohol-related diseases. Besides current diagnostic measures and treatment strategies, the book deals with the many underlying molecular and genetic mechanisms of alcohol toxicity. Novel insights include prospective data on all-cause mortality and the emerging major role of alcohol-mediated hemolysis and enhanced red blood cell turnover. The book also aims at guiding policy makers to handle the topic of alcohol in our society more responsibly. *Communicating Disability*

Erin Willis, Chad Painter, 2025-06-30 This book enables readers to confidently discuss and understand disability as part of the broader societal conversation on diversity, equity, and inclusion. The influence of mass media can raise awareness, educate, reduce stigma, facilitate advocacy related to disability, and activate attitude and behavior change. Recognizing that disability is a complex, multi-dimensional topic, this book presents case studies, original research, and practical applications related to society and cultural events about disability to highlight prominent issues related to diversity, equity, and inclusion initiatives. While previous work examined disability through activism or historical lenses, this book explores contemporary industry practices and how current conversations are driving trends in the field. Divided into three parts related to journalism and news reporting, strategic communication, and health communication, the book provides readers with the knowledge and skills to create conversation that gives space to disability and facilitates advancement in inclusion. Filling a void in disability literature, this book will be of interest to scholars as well as undergraduate and graduate students in the fields of health communication, journalism, strategic communication, media studies, disability studies, public health, and medical sociology.
