

.303 BRITISH

SPECIFICATIONS:

Bullet Dia. Jacketed and Cast	See Cartridge Story
Maximum Case Length	2.222"
Trim-to Length	2.212"
Maximum Overall Length (w Bullet)	3.075"
Primer Size	Large Rifle
Lyman Shell Holder Number	7
Firearms used for Test	S.M.L.E.
Barrel Length	25" Jacketed/23" Lead
Twist	1-10"

An extreme variation in groove diameters exist in rifles chambered for this cartridge. In rifles which we have checked, diameters range from .309" to .317". We suggest that you slug your barrel before reloading (see "Accuracy with Cast Bullets" in reference section). Jacketed bullets are available in three diameters; .311" (Speer and Sierra), .312" (Hornady), .313" (Speer). Use the jacketed bullet which most closely corresponds to your groove diameter. If your groove diameter runs on the small size (under .310") the use of jacketed bullets is not recommended at all. If your groove diameter should be large (over .314") results will be poor.

Cast bullets should be sized as near groove diameter as possible. Bullet #311466 should not be used where a sizing diameter larger than .311" is required.
