Introduction to Neuroscience I, **The Mystery of Life What'S It All About?** David E. Peeples, 2018-03-15 Have you ever seriously considered the most difficult and puzzling questions presented to our minds during this mortal sojourn through an often difficult and challenging existence? Who am I? Where did I come from? Why am I here? Where am I going? And perhaps the most important question of all: What is my purpose for living? In this ultra-modern digital world of today, many people have become so preoccupied with the daily pursuits of life and the addictive overuse of time-consuming technology that many of them rarely pause to seriously consider what life is actually all about. In writing *The Mystery of Life*, it has been my hope and my goal to personally challenge each reader to consider many relevant facts and to follow a line of evidence pointing toward a worldview that is often overlooked and too easily marginalized. We live in an aggressive technology-driven world where the wild pursuit of power, prestige, possession, and pleasure has become the driving

influence ruling over many of our lives What does your worldview look like Is there enough evidence to support it beyond reasonable doubt If not then I invite you to consider a vast body of mounting evidence that could lead toward a more accurate discernment of an often confusing existence The view of life that we have each come to know will strongly influence everything we do say and become in this world Based on a remarkable consensus of evidence perhaps we should consider a worldview understanding that will ultimately avail our hearts and minds of the personal fulfillment and satisfaction we have always longed for and often dreamed of We owe it to ourselves to seriously consider where the evidence is leading us Isnt it about time to discover the answers to our most persistent and pressing questions The Mystery of Life is presented as a literary expose addressing the questions of origin meaning morality and destiny **Biology (8th edition)**. Plants, Animals, People, Aliens Marie I. George, 2025-07-25 Aristotle famously maintains in his treatise *On the Soul* that there are three kinds of living things plants animals and humans and he speaks of each kind as having a soul St Thomas Aquinas adopts these same views Nowadays however many thinkers reject them on the grounds that they are incompatible with modern science Molecular biology is seen as affording a superior way of categorizing life forms Evolutionary biology appears to have established that humans are simply primates with adaptations somewhat different from other primates Plant physiology uncovering plants directional responses to a wide variety of different stimuli provides reason to think that plants sense light pressure odor pathogens etc in which case plants are simply non mobile animals similar to coral Neuroscience by showing the dependency of thought choice perception and emotion on the central nervous system especially on the brain seems to have eliminated any need to posit a soul *Plants Animals People Aliens* addresses these and a variety of other science based claims about living things by bringing Aristotelian Thomistic teachings to bear upon them While not a systematic work it both treats some of the most hotly debated philosophical questions concerning living things such as what it means to be alive as well as treating questions less often raised by philosophers such as whether animals have a theory of mind Though geared primarily to those conversant with the Aristotelian Thomistic tradition many of its key concepts are traced back to experiences that we all share in common thus rendering these concepts intelligible if not convincing to those with scientific and other backgrounds who are curious about this philosophical approach to living things The author strives to show how Aristotelian Thomistic philosophy and science complement one another by sketching out the fuller understanding of the living realm that the two together provide The book's final section considers the possibility and the likelihood that embodied rational beings exist elsewhere in our universe Here theological arguments drawn from the Christian faith are presented alongside philosophical and scientific arguments This section closes with a theological discussion of the disputed question of whether extraterrestrials were they to exist should be baptized
