Regulating Blockchain Philipp Hacker, Ioannis Lianos, Georgios Dimitropoulos, Stefan Eich, 2019-08-29 Less than a decade after the Financial Crisis we are witnessing the fast emergence of a new financial order driven by three different yet interconnected dynamics first the rapid application of technology such as big data machine learning and distributed computing to banking lending and investing in particular with the emergence of virtual currencies and digital finance second a disintermediation fuelled by the rise of peer to peer lending platforms and crowd investment which challenge the traditional banking model and may over time lead to a transformation of the way both retail and corporate customers bank and third a tendency of de bureaucratization under which new platforms and technologies challenge established organisational patterns that regulate finance and manage the money supply These changes are to a significant degree driven by the development of blockchain technology The aim of this book is to understand the technological and business potential of the blockchain technology and to reflect on its legal challenges The book mainly focuses on the challenges blockchain technology has so far faced in its first application in the areas of virtual money and finance as well as those that it will inevitably face and is partially already facing as the SEC Investigative Report of June 2017 and an ongoing SEC securities fraud investigation show as its domain of application expands in other fields of economic activity such as smart contracts and initial coin offerings The book provides an unparalleled critical analysis of the disruptive potential of this technology for the economy and the legal system and contributes to current thinking on the role of law in harvesting and shaping innovation

Reassessing the convergence thesis. An analysis of the 2018/2019 Corporate Governance Codes of the United Kingdom and Germany Thomas Böhm, 2019-11-08 Doctoral Thesis Dissertation from the year 2019 in the subject Law Civil Private Trade Anti Trust Law Business Law grade A University of Edinburgh Edinburgh Law School course Dissertation in Law language English abstract This paper presents a reassessing the convergence thesis It takes the adoption of the new German Corporate Governance Code 2019 GCGC as an opportunity to verify the thesis whether signs of convergence of contrasting corporate governance systems towards a single model are evident For this purpose a comparative analysis of the GCGC and the UK Corporate Governance Code 2018 UKCGC is conducted The UKCGC and the GCGC originate from competing corporate governance systems the UK enlightened shareholder value model and the German stakeholder model so the two Codes are ideally suited for a comparative analysis to verify the convergence thesis It shows that the advancing globalization has generally contributed to a shift towards an Anglo American corporate governance pattern in European countries Convergence is also attributable to the harmonization of national laws through EU legislation The comparative analysis of the UKCGC and the GCGC reveals broad signs of convergence with a large number of similar corporate governance mechanisms and provisions Nevertheless there are still region specific differences in the Corporate Governance

Codes that can be traced to the underlying corporate governance philosophy However board practice demonstrates that the structural differences between the two corporate governance systems are blurring The comparative analysis also illustrates that the Corporate Governance Codes are converging from both sides *Forthcoming Books* Rose Army,1984
