

100 Instrumentation Interview Questions and Answers

Editorial Staff Save it

Last updated: 2023/06/13 at 10:44 AM

Instrumentation is a multi-faceted field that intertwines engineering and scientific principles to measure, control, and regulate various processes in industries like manufacturing, medicine, research, and more.

Instrumentation forms the backbone of any automated process, dealing with the design, configuration, and operation of devices that can monitor or manipulate physical quantities. The instrumentation field encompasses both the theoretical understanding of phenomena and the practical ability to apply that understanding to real-world scenarios. As technologies continue to evolve, so too does the field of instrumentation, providing professionals with exciting and challenging opportunities to innovate and make significant contributions in various sectors.

Instrumentation Interview Questions

Our comprehensive guide of 100 Instrumentation Interview Questions and Answers to get deep insight into industrial instruments.

Can you explain what process control is?

Process control is a statistics and engineering discipline that deals with architectures, mechanisms, and algorithms for maintaining the output of a specific process within a desired range.

What is the purpose of a PID controller?

A PID controller is used to control a process by continuously adjusting the control inputs in order to minimize the difference between the desired setpoint and the measured process variable.

Can you describe the working principle of a thermocouple?

A thermocouple works on the principle of the Seebeck effect. It generates a voltage when its junction of two different metals is heated or cooled.
